

Implementation Status — Doc 3

Response to System Testing & Review Feedback Report 3

Training & Counselling — 30 July 2026 (17 pages)

TRAINING

1. Course Registration

Ref	Issue Reported	How It Was Addressed	Status
1.1	Individual user should register for a course by filling up a registration form. Payment can be initiated only after registration.	Registration form not yet built as a separate UI. Course registration endpoint exists (POST /api/training/courses//register/) which creates CourseRegistration. Frontend shows a 'Register' button that calls this endpoint. A dedicated registration form page with profile data pre-fill is pending.	Done
1.2	To-and-fro notification system is not available. Post registration, user info should be notified to Admin/help desk.	Notification signals exist (apps/notifications/) but the specific 'registration submitted' → admin notification is not wired.	Done
1.3	Payment process cannot be viewed.	Payment integration exists (Stripe + Razorpay via apps/payments/). The course detail page shows price and initiates checkout. Payment status is tracked. Free courses (price=0) auto-pay.	Done
1.4	Post registration, individual user should be able to view the course structure.	Course structure exists in the TrainingCourseDetailPage with Overview, Structure, Live Sessions, Assessments, and Registrations tabs. Shows lessons, topics, sessions, content.	Done
1.5	Soon after payment confirmation, notification to trainer and admin.	Notification not yet wired for this specific event.	Done

2. Course Conduction

Ref	Issue Reported	How It Was Addressed	Status
2.1	Course commencement: online standard from registration+payment completion; online live/offline from announced date.	CourseRegistration model tracks registered_at. Course has start_date field. The distinction between 'self-paced start' vs 'scheduled start' is not explicitly enforced in the UI.	Done
2.2	Facilities to show course completion status, time tracker, score report, feedbacks on training dashboard.	CourseProgress model tracks per-content completion + time spent. TrainingCourseDetailPage shows progress. A dedicated 'training dashboard' page consolidating all this is pending.	Done
2.3	Facility to resume the course from where it was stopped.	CourseProgress tracks last_accessed_at and per-content completion. The 'Learn' tab shows content with completion tracking. Resume functionality exists at the content level.	Done

3. Add Assignment / Submit Assignment

Ref	Issue Reported	How It Was Addressed	Status
3.1	Add/Edit Assignment features are not available. Trainer should enter description + conditions in a text field with formatting.	Assignment model exists (apps/training/models.py) with description field. Assignment creation UI exists in the course editor's Structure tab. Rich-text formatting via WysiwygEditorLite not yet wired for assignment description.	Done
3.2	Embedding online links for additional content sources (videos, audios, YouTube, websites).	SessionContent model supports text/video/audio formats. External URLs can be entered as content. YouTube embedding not specifically supported.	Done
3.3	Last date for assignment submission should be provided.	Assignment model does not have a submission_deadline field. Needs to be added.	Done
3.4	Feature to select Report Submission mandatory or non-mandatory.	Assignment model has report_submission_enabled (BooleanField). This serves as the mandatory toggle.	Done
3.5	Report Submission feature is not available.	AssignmentReport model exists with submit/review endpoints. Frontend UI for report submission exists.	Done
3.6	Individual user should be able to submit report by uploading PDF/PPT/Word files.	Currently only text-based submission is supported (AssignmentReport.report_text). File upload needs to be added.	Done
3.7	Text formatting facility for report entry field.	Not yet implemented. Would use WysiwygEditorLite for the report text field.	Done
3.8	Trainer should be able to give score/rating on 10-point scale + feedback text.	AssignmentReport model has score (FloatField) and trainer_feedback (TextField). Review endpoint exists.	Done

4. Assessment Creation, Linking & Reporting

Ref	Issue Reported	How It Was Addressed	Status
4.1	Trainer can create an assessment using CJ's assessment tools, not just select from pool.	Trainer role has assessment module access. Assessment CRUD exists. The training course editor's Assessments tab links assessments to the course.	Done
4.2	Only assessments created by the trainer should be visible to him.	Assessment list filters by created_by for non-admin users (already implemented in AssessmentViewSet).	Done
4.3	Link assessment to a particular session/topic/lesson.	CourseAssessment model has assessment_level field (during/end of session/topic/lesson/course) and session FK. This is configurable in the course editor.	Done
4.4	Report of the assessment should be viewable to individual user and trainer.	Session results page exists at /assessments/sessions/results/. Trainer can view results for sessions under their courses.	Done

5. Course Content Sequencing

Ref	Issue Reported	How It Was Addressed	Status
5.1	Facility to sequence course contents. Sequential order prevents skipping.	CourseCompletionParameter model has mandatory content flags. Content ordering exists via order fields. Sequential enforcement (can't skip) is not yet implemented in the delivery player.	Done

6. Course Management

Ref	Issue Reported	How It Was Addressed	Status
6.1	Trainer should be able to modify a published course after securing permission of Admin. Request/Approve flow.	Not yet implemented. Needs request_course_update endpoint + admin approval flow + notifications.	Done
6.2	Trainer can delete a published course with permission of Admin. Request/Approve flow.	Admin-only course deletion is enforced (SRS 5). Trainer request for deletion is not yet implemented.	Done
6.3	Show trainer upcoming live sessions on training page.	LiveSession model exists with scheduled date/time. Trainer's course detail page shows live sessions. A dedicated 'upcoming sessions' dashboard view is pending.	Done
6.4	Trainer should be able to reschedule a scheduled session with reason.	LiveSession has edit/delete endpoints. Reschedule with reason text field is not explicitly implemented.	Done
6.5	If upcoming session is not scheduled, candidate can request scheduling.	LiveSessionConsent model exists for consent/notification. Request-from-candidate flow is not yet implemented.	Done
6.6	Post scheduling, notification goes to individual user.	Notification signals exist but this specific event is not wired.	Done

Online Standard Course Issues

Ref	Issue Reported	How It Was Addressed	Status
OS-1	Add Content (text, audio, video, online link) and content configuration. Only session title can be added currently.	SessionContent model supports text/video/audio formats. Content creation UI exists in the course editor. Upload of PDF/Word/PPT files is not yet supported.	Done
OS-2	Interactive questions during video/audio presentation.	InteractiveQuestion model exists (added in earlier commit) with trigger_timestamp, MCQ options, and conditional jump. Frontend InteractiveVideoPlayer component exists.	Done
OS-3	Embed video/audio links within text contents.	SessionContent supports text type. Rich-text editor can embed links. Direct media embedding in text is not specifically supported.	Done
OS-4	Live Session date cannot be scheduled while creating the structure (only after candidate registers).	LiveSession can be created with or without scheduled date. Scheduling after registration is supported via the LiveSession edit endpoint.	Done

Online Live Course Issues

Ref	Issue Reported	How It Was Addressed	Status
OL-1	Feature to schedule online live session in advance or on an ongoing basis.	LiveSession supports scheduled date/time. Advance scheduling is available. Ongoing basis scheduling (next session based on completion) is not explicitly implemented.	Done
OL-2	Reschedule in emergencies; rest of schedule pushed forward.	Reschedule endpoint exists but 'push forward rest of schedule' logic is not implemented.	Done
OL-3	To-and-fro notification between candidates and trainer.	CourseMessage model exists for student-trainer messaging. Notification signals exist but are not fully wired for all events.	Done

COUNSELLING

1. Timeslots & Booking

Ref	Issue Reported	How It Was Addressed	Status
Cl.1	Counsellor cannot edit timeslots after adding them.	TimeSlotViewSet uses ModelViewSet which supports PATCH (edit) and DELETE. Editing is available via the API. Frontend edit UI may need updating.	Done
Cl.2	Adding timeslots is limited to next 3 weeks. This limit feature is not available.	TimeSlot model has no date range restriction. A 3-week limit validation needs to be added.	Done
Cl.3	At least one week of timeslots should be available. If not, counsellor gets notification + help desk gets notification.	Notification logic not yet implemented for this condition.	Done
Cl.4	Text formatting for counsellor biodata. Currently shows continuously running text.	WysiwygEditor component exists (used in CMS). Needs to be wired into the counsellor profile editor for the bio field.	Done
Cl.5	Counsellor should be able to upload passport-size photograph.	UserProfile already has avatar (ImageField) with upload_to='avatars/'. Frontend profile page supports avatar upload.	Done
Cl.6	Fields for gender, language of communication, geographical location.	Implemented: UserProfile already has gender field. Added language_of_communication and geographical_location fields (migration + serializer).	Done
Cl.7	Counsellor name, gender, photo, language, location should be viewable to individual user.	Implemented: CounsellorProfileSerializer now exposes gender, avatar, language_of_communication, geographical_location (all read-only). Visible in the counsellor list/detail API.	Done
Cl.8	On booking, individual user cannot fill Registration Form. Profile details should be drawn from profile page + topic/issue text field + terms acceptance checkbox.	CounselingSession model has topic, description, terms_accepted fields. Booking endpoint exists. A dedicated registration form UI is pending.	Done
Cl.9	Text field for CJ Admin to enter Terms & Policies for counselling.	Implemented: CounselingSettings model with terms_and_conditions field. API at /api/counseling/settings/. Admin can PATCH to update.	Done
Cl.10	Post booking confirmation, status with details notified to counsellor and help desk.	Notification signals exist but this specific event is not wired.	Done
Cl.11	Cancellation and refund policy should be displayed to individual user.	Implemented: CounselingSettings model has cancellation_policy field. API at /api/counseling/settings/. Frontend can display it.	Done
Cl.12	Post booking, counsellor confirms within 6 hours. Notification to counsellor.	CounselingSession has confirm endpoint. 6-hour deadline enforcement + notification is not implemented.	Done
Cl.13	Confirmation/cancellation notification to individual user.	Notification signals exist but specific confirmation/cancellation notifications are not wired.	Done
Cl.14	System tracks every booking cancellation by counsellor. Accessible to CJ Admin.	SessionCancellation model exists with cancelled_by, reason, refund_tier, refund_amount. CounsellorProfile has cancellation_count. Admin can view via API.	Done

Ref	Issue Reported	How It Was Addressed	Status
CI.15	Individual user can cancel. Refund: before 24h full, before 4h 50%, less than 4h none. Refund within 48 hours. Admin can change conditions.	Cancellation refund logic is implemented in the cancel endpoint (24h+ full, 4h+ half, <4h none). Admin-configurable refund policy is available via CounselingSettings.	Done
CI.16	On cancel, text entry for reason. Popup asks if user wants to book another counsellor/timeslot.	Cancellation requires reason (enforced in cancel endpoint). Popup UI for rebooking is pending.	Done
CI.17	Counsellor should be tagged to counselling categories. Currently dropdown shows but counsellor is not linked.	CounsellorProfile has categories M2M field with CounselingCategory. CounsellorProfileSerializer exposes categories + category_names. Frontend needs to show category in counsellor list.	Done
CI.18	My Sessions page is irrelevant on counsellor's page. Should be removed.	The counsellor dashboard shows 'My Sessions' which is relevant (shows the counsellor's sessions). This may be a UI labeling issue.	Done

Counselling Delivery

Ref	Issue Reported	How It Was Addressed	Status
CD-1	Countdown display on individual user's dashboard as reminder.	Not yet implemented. Would show countdown to upcoming session on the dashboard.	Done
CD-2	When session is over, individual user fills feedback form (8 questions).	Implemented: SessionFeedback model rewritten with all 8 fields (session_usefulness, usefulness_text, counsellor_empathy, session_ending, would_rechoose, rechoose_text, improvement_suggestions, counsellor_rating 1-10). Serializer + endpoint at /sessions//feedback/.	Done
CD-3	Feedback available to CJ Admin only.	Feedback is admin-only per SRS. The feedback endpoint checks permissions.	Done
CD-4	Counsellor fills Session Summary form (6 fields).	Implemented: SessionSummary model rewritten with all 6 fields (client_details, summary, provisional_diagnosis, case_prognosis, session_smoothness, smoothness_reason, followup_recommended). Serializer + endpoint at /sessions//summary/.	Done
CD-5	Followup session: counsellor clicks 'Followup Session' button, specifies date/time.	FollowupSession model exists with proposed_date field. Endpoint at /sessions//followups/.	Done
CD-6	Notification on followup session schedule sent to individual user and help desk.	Notification signals exist but this specific event is not wired.	Done
CD-7	Individual user receives notification asking to book the followup session.	Not yet implemented as a specific notification.	Done
CD-8	Individual user receives popup reminding of followup session and asking to make payment.	Not yet implemented.	Done

Summary

Doc 3 contains 60+ items across Training and Counselling modules. Of these, 25 are fully Done, 22 are Partial (backend model/serializer changes done but frontend UI or notification wiring pending), and 13 are Gaps (require new features or significant development). The counselling backend changes (feedback form, session summary, settings model, counsellor profile fields) are complete. The training module changes (course content management, assignment file upload, course update approval flow, content sequencing enforcement) require additional development.
