

Multiple Questions Display style

1. Passage Display Question Type

The question opens with Question Text1 (Mandatory) and display button. When the test taker clicks on the *Click to Show* button, passage appears in the passage field.

Read the passage and answer the questions that follow.

Note: You have 90 seconds (1.5 minutes) to read it. After this the passage will disappear.

Click to show the passage

An atom is the smallest unit of matter that retains the properties of an element. At its center lies the **nucleus**, a dense core made up of positively charged **protons** and neutral **neutrons**, which together account for nearly all of the atom's mass. Surrounding the nucleus are **electrons**, negatively charged particles that move within regions called **orbitals** or **shells**. Although electrons are extremely light compared to protons and neutrons, their arrangement determines how atoms interact and bond chemically. In a neutral atom, the number of protons equals the number of electrons, balancing the charges. Historical models of the atom evolved from Dalton's solid sphere idea to Thomson's "plum pudding," Rutherford's nuclear model, Bohr's energy levels, and finally the modern **quantum mechanical model**, which describes electrons as existing in probability clouds rather than fixed paths. This structure explains the atom's stability, its ability to form molecules, and the diversity of chemical behavior observed in nature.

When the time (90 sec) expires, the display box and **click to show** button disappears. The test taker cannot click again to display the passage.

Then, question 1 based on the passage appears. Display style is shown below.

Read the passage and answer the questions that follow.

Note: You have 90 seconds (1.5 minutes) to read it. After this the passage will disappear.

Which element in an atom is relatively more unstable?

- ☐ Protons
- ☐ Electrons
- ☐ Neutrons
- ☐ Nucleus

Previous

Next

When the test taker clicks **Next**, second question appears, and so on until the last question in the series.

Note: Each sub question has a question text field and option fields.

2. Video-based Question Type

The question opens with Question Text1 (Mandatory) and play button. When the test taker clicks on the *Click to Play* button, Video starts playing in the passage field.

You will view a short video in this question. Based on the conversations in the video, there will be questions which you have answer by choosing correct answers.

Note: The video can be played only once. Therefore, pay close attention.

Click to Play the Video

Video Field

When the video presentation is over, the video field and ***click to play*** button disappears. The test taker cannot click again to play the video.

Then, question 1 based on the passage appears. Display style is shown below.

You will view a short video in this question. Based on the conversations in the video, there will be questions which you have answer by choosing correct answers.

Note: The video can be played only once. Therefore, pay close attention.

Based on the video which statements correctly represent the theme of the interview?

- ☐ The two men represent a marketing company in the energy sector.
- ☐ Uncertainty in the energy markets is a current reality.
- ☐ Angion is doing well in energy business.
- ☐ There is aggressive competition in the market.

Previous

Next

When the test taker clicks ***Next***, second question appears, and so on until the last question in the series.

Note: Each sub question has a question text field and option fields.
