

System Testing & Review Feedback Report

Standard Question Types

The following feedbacks from system testing describe issues in Question Bank configuration and front-end Assessment presentation. The common feedbacks pertain to multiple question types, therefore presented below as a separate section. Specific question-type level issues follow in subsequent sections.

Common Feedbacks:

At Question Configuration Level

Common Issue 1. Question types with multiple questions, such as Audio-based, Video-based, Passage Display, and Image Display questions, should have the feature to add more than one questions under one audio, video, passage or image. Instead of presenting the same passage repeatedly under different questions, this facility helps pooling a bunch of questions presented under one audio, video, passage or image.

Common Issue 2. Question Text1 and Text2 entry fields on *CreateQn* page should have formatting. Often the user has to separate main question text from secondary texts by inserting lines/adding space between two texts, highlighting some texts in different color, bold or italics texts, etc. This facility will make front-end display of question texts more appealing and less confusing.

At Assessment Front-end Level

Common Issue 1. In questions with multiple-answers, each correct answer option selected by the test taker should receive a score of 1 and each incorrect answer option selected a score of -1. Suppose, if there are three correct answers for a question, and if he selects two correct answers and one incorrect answer, then he gets a summary score of 1. However, if the number of wrong answers selected is more than the number of correct answers selected, then the score is fixed at zero. The total score cannot be a negative value. However, currently, the total score is 1. If the test taker chooses an incorrect option, the final score will become zero, irrespective of the number of correct or incorrect options selected.

(*Applicable for all questions with multiple correct answers*) Ref: *Career Judge_ Question Types Details*, page 14, Section 4

4 Grid List Selection _ Multiple Answers under One Question

Scoring: (0,n) – Each correct option selected will be assigned a score of ONE. Each incorrect option selected will be given a **NEGATIVE ONE** (-1). Thus if the candidate select 5 correct options and 3 incorrect options, he will get **a score of 3**. However, if the number of incorrect options selected is greater than the number of correct options selected, then NO NEGATIVE score is assigned, instead he is given a score of zero on that question.

Common Issue 2. For all questions types involving a play/display/flash property the Question Text1 should be placed above the play/display/flash fields, while Question Text2 (optional) should be placed below them. Question Text1 serves as an instruction field, which tells the test taker about purpose and conditions of the question, whereas Question Text2 includes the actual question based on the audio, video, passage, or image.

Watch carefully the images flashed and enter the names of as many images as you can remember. Note: Images will be flash for a very short interval, and replay is not

Common Issue 3. For question types with a **timed presentation/display**, such as Audio-based, Video-based, Passage Display, and Image Display questions, **the presentation cannot be repeated**. The test taker should not be able to replay/re-view the respective content again. The question will be ineffective if he is able to view/play it repeatedly.

2(d) Fill-In-The Blank _ IMAGE Flash _ Multiple Fields

options are displayed. No replaying of the FLASH LIST is allowed

Scoring: (0,n) – Correctly filled options receives a score of one or more, while incorrect options receives zero. There are **TWO or MORE** fill-in-the-blanks in one question.

On the FLASH screen, there are one TEST TITEL filed, one QUESTION ID field, one QUESTION TEXT field and IMAGE FLASH field.

On the QN/Answer screen, one QUESTION TEXT field and RESPONSE OPTION fields are given. This screen is displayed after the FLASH screen disappears.

NO REPLAY OF FLASH LIST

Recommendation1. Add an additional feature at the Question Configuration page to give two options: *Timed Display* or *Unlimited Display*. The user can select either option. If Timed Display option is selected, the above explained process applies, and if the alternative option is selected, unlimited display feature applies (as currently available). For example, a passage display will remain until the test taker moves to the next question. *Previous* navigation also will display the passage.

Recommendation2. In case of videos and audios where the presentation automatically expires at the end of the audio/video, an option to select “*Replay Permitted*” or “*Replay Not Permitted*” is given to the user on the AddQuestion page. In the first case, test taker can replay any number of times, while in the second case, replay is disabled. The first option is useful for training purposes, where candidate can replay the display item any number of times, until he gets the correct answer.

Common Issue 4. For all questions types involving a **timed play/display/flash**, the **Question Text2 and answer options should appear only after the presentation is over**. Displaying the question/s during the presentation invalidates the objective of the question.

Common Issue 5. Navigation to a previous Audio, Video, Passage display, Image display should not allow the test taker to play/view the presentation content again. Only the question texts and answer options shall be displayed. The purpose is to allow the test taker to modify an answer, if he wants, but he should not be allowed to watch/view the content again.

Common Issue 6. Wherever images are uploaded at the question or option level, the image size is very small. They should be big enough to allow the test taker to view details of the image. Often, they have to analyze small details and patterns in the image to find out the correct answer.

Common Issue 7. When question fields involve image and answer options are many, the test taker cannot view the last options at the bottom. If he fails to scroll down to check whether more options are there or not, he may miss them.

Recommendation. The arrangement of options can be in columns, so that two options come in one column and the other two in second column. (However, if the option text is too lengthy, two-column arrangement will be fuzzy.) A possible solution is to give a feature on Question Configuration page that allows the user to select either *One-Column Option Display*, *Two-Column Option Display*, or *Three-Column Option Display*.

Common Issue 8. When two audio/video/flash/display questions are presented one after another, the presentation content (audio, video, etc.) does not change. The presentation content of the first question repeats in the second question, whereas the question texts of the second question are presented in question/option fields. For example, during a testing session, the first question showed images. When testing moved to the next question, instead of word flash the image flash from the first question was repeated.

Common Issue 9. Hide question details on *TakeAssessment* page, such as question type, difficulty level, etc. The test taker does not need to see such backend information.

Common Issue 10. Currently, timer is displayed in a small box. It should be highlighted in a bigger box in bigger font. It is important that the test taker pay attention to time elapsed.

Question-Specific Feedbacks:

1 . MCQ-Text/Image Question _ Single/Multiple Answers

1. Admin User >> TakeAssessment >> MCQ-Text/image Qn (Ref: *Career Judge_ Question Types Details, page 1, Section 1a*)

Carefully study the image shown below and answer the question following it.

What is machine called?

☐ Drill Press

☐ Lathe Machine

☐ Shaper Machine

☐ Milling Machine

Issue 1. The image ar etail.

Issue 2. The last option is not visible to the test taker when the page opens. He can see it only after scrolling down. If he does not, he may miss the option.

Issue 3. Question Text1 should be placed above the question image, while Question text2 should be below the image (as currently presented).

Issue 4. In the case of multiple-answer feature, the scoring logic should be modified as explained earlier.

Ref: Ref: *Career Judge_ Question Types Details, page 14, Section 4*

4 Grid List Selection _ Multiple Answers under One Question

Scoring: (0,n) – Each correct option selected will be assigned a score of ONE. Each incorrect option selected will be given a **NEGATIVE ONE** (-1). Thus if the candidate select 5 correct options and 3 incorrect options, he will get a score of 3. However, if the number of incorrect options selected is greater than the number of correct options selected, then NO NEGATIVE score is assigned, instead he is given a score of zero on that question.

Note: Correction – score received in sample case above is 2, i.e., (5 – 3 = 2)

Carefully study the image shown below and answer the question following it.

From the following options, identify the uses of a lathe machine.

☒ Turning	Score of 1
☒ Facing	Score of 1
☐ Grinding	
☒ Molding	Score of -1
☒ Thread Cutting	Score of 1
☐ Metal Bending/Forming	

Total score is 3 – 1 = 2

Score Summary

TOTAL SCORE	PERCENTAGE
0.0	0.0%
/ 1.0	

2. MCQ-Text/Image Qn with Single/Multiple Answers

1. Admin User >> TakeAssessment >> MCQ-Text/image Qn (Ref: *Career Judge_Question Types Details, page 2, Section 1b*)

Issue 1. Image size is too small. Test taker cannot see the question image and options with clarity and in detail. The image size should be same as the image uploaded.

Issue 2. The highlighted texts in option fields '(image)' is an unwanted text, hence they should be hidden/removed.

Issue 3. Question Text1 should be placed above the question image, while Question text2 should be below the image (as currently presented).

Issue 4. Multiple-answers question scoring issue. Apply the scoring rule for multiple-answers as explained earlier.

A portion of the image shown below is cut out, and you have to identify one among the options exactly match with cut-out portion.

Which of the following images exactly match with the cut-out portion?

☐  (image)

☒  (image)

☐  (image)

☐  (image)

3. MCQ _ Audio-Multiple Questions with Single/Multiple Answers

1. Admin User >> CreateQn >> MCQ-Audio-MultipleQn_Single/Multiple Answers Qn (Ref: Career Judge_ Question Types Details, page 3, Section 1c)

Issue 1. There is no feature to add multiple questions. Currently only one question can be added.

Confidential Document

1(c) Multiple Choice –Audio_ Multiple Questions

Scoring: (0,1) – Correct option receives score one, while incorrect options receives zero. After the display of AUDIO, **ONE or MORE** questions are presented with answer options for each question on subsequent screens. Each question receives a score one or zero.

On the DISPLAY SCREEN, there are one TEST TITEL filed, one QUESTION ID field, one QUESTION TEXT field and PLAY button. There is no SUBMIT button here.

On the Qn/Answer SCREEN, one QUESTION TEXT field and RESPONSE OPTION fields are given. It appears only after the PLAY SCREEN disappears. **NO REPLAY OF AUDIO**

If clicked to come back to the question (from "NEXT Question page), only answer options are displayed. No replaying of AUDIO is allowed

1. Admin User >> TakeAssessment >> MCQ-Audio-MultipleQn_Single/Multiple Answers Qn

Issue 1. Audio is not available.

Issue 2. Question Text1 should be placed above the Audio field, while Question text2 should be below the image (as currently presented). No replay of audio is allowed.

Issue 3. Multiple-answers question scoring issue. Apply the scoring rule for multiple-answers as explained earlier.

1c: MCQ - Audio with Multiple Questions · Medium

Audio not available

☆ Bookmark

You will hear a short audio and be required to answer questions based on what you hear. Note: Pay attention to the audio closely because it will not be repeated.

Based on the audio, which of the following statements are true?

☒ Atom retains the properties of an element.

Score of 1

☐ Protons are the lightest element within an atom.

☒ Positively charged particles move within orbitals or shells.

Score of -1

☒ When the number of protons equals the number of electrons, the atom becomes neutral.

Score of 1

☐ Dalton's solid sphere idea describes electrons as existing in probability clouds.

☒ Atom's stability is defined by the structure of its electrons.

Score of 1

Total score is 3 – 1 = 2

4. MCQ _ Video-Multiple Questions with Single/Multiple Answers

1. Admin User >> CreateQn >> MCQ-Video-MultipleQn_Single/Multiple Answers Qn (Ref: Career Judge_ Question Types Details, page 4, Section 1d)

Issue 1. There is no feature to add multiple questions. Currently only one question can be added.

Confidential Document

1(d) Multiple Choice –Video _ Multiple Questions

Scoring: (0,1) – Correct option receives score one, while incorrect options receives zero. After the display of VIDEO **ONE or MORE** questions are presented with answer options for each question on subsequent screens. Each question receives a score one or zero.

On the DISPLAY SCREEN, there are one TEST TITEL filed, one QUESTION ID field, one QUESTION TEXT field and PLAY button. There is no SUBMIT button here.

On the Qn/Answer SCREEN, one QUESTION TEXT field and RESPONSE OPTION fields are given. It appears only after the PLAY SCREEN disappears.

If clicked to come back to the question (from "NEXT Question page), only answer options are displayed. No replaying of Video is allowed

NO REPLAY OF VIDEO

1. Admin User >> TakeAssessment >> MCQ-Audio-MultipleQn_Single/Multiple Answers Qn

Issue 1. Audio is not available.

Issue 2. Question Text1 should be placed above the Audio field, while Question text2 should be below the image (as currently presented).

Issue 3. Multiple-answers question scoring issue. Apply the scoring rule for multiple-answers as explained earlier.

The screenshot shows a user interface for a video-based multiple-choice question. At the top, it says "1d: MCQ - Video with Multiple Questions" and "Easy". A video player area shows "Video not available". Below this, the question text is: "You will view a short video in this question. Based on the conversations in the video, there will be questions which you have answer by choosing correct answers. Note: The video can be played only once. Therefore, pay close attention." The question is: "Based on the video which statements correctly represent the theme of the interview?". There are four options, each with a checkbox and a score box:

- ☐ The two men represent a marketing company in the energy sector. (Score of 0)
- ☒ Uncertainty in the energy markets is a current reality. (Score of 1)
- ☒ Angion is doing well in energy business. (Score of 1)
- ☐ There is aggressive competition in the market. (Score of 0)
- ☒ Energy demand is declining currently. (Score of -1)

A box on the right indicates the total score: "Total score is 2 – 1 = 1".

5. MCQ _ Image Flash Qn with Single/Multiple Answers

1. Admin User >> TakeAssessment >> MCQ-Image Flash (Ref: *Career Judge_Question Types Details, page 6, Section 1f*)

Issue 1. Multiple-answers question scoring issue. Apply the scoring rule for multiple-answers as explained earlier.

Score Summary

You will see a series of images flashed on the screen. Pay close attention and remember as many as you can. Note: The display will not be repeated.

From the following list which ones did you NOT see in the list just flashed?

☐ Chimpanzee

☒ Television

☐ Beetle

☒ Butterfly

☐ Boat

☒ Car

Issue 2. Flash REPLAY should be disabled.

Issue 3. Play button should be disabled when the test taker goes back to a previous image-flash question.

Issue 4. Image display should be bigger. The test taker with vision limitation also should be able to view and differentiate the image displayed. (Applicable for Word Flash items also)

Issue 5. Question Text1 should be above the Flash Display field.

Issue 6. Text2 and answer options should appear only after the flash display is over. Currently the question and options are visible before and during the flash display.

☐ Car	

6. MCQ _ Word Flash Qn with Single/Multiple Answers

1. Admin User >> TakeAssessment >> MCQ-Word Flash (Ref: *Career Judge_ Question Types Details, page 5, Section 1e*)

All issues from *Multiple Choice _ Image Flash Question* are applicable in this question type too.

Additional Issue 1. When two flash questions are presented one after another, the first flash list repeats in the second question. During a testing session, the first question showed images. When testing moved to the next question, instead of word flash the image flash from the first question was repeated.

7. MCQ _ Passage Display Question-Multiple Questions

1. Admin User >> QB >> AddQn >> MCQ-Passage Display (Ref: *Career Judge_ Question Types Details, page 7, Section 1g*)

Issue 1: The requirement specifies that multiple questions can be presented with MCQ answer options. However, currently the user can add only one question. Multiple-questions based on the same passage should be enabled.

Confidential Document

1(g) Multiple Choice _Passage-Display _ Multiple Questions

If clicked to come back to the question (from "NEXT Question page), only answer options are displayed. No REPEAT DISPLAY of the PASSAGE is allowed

Scoring: (0,1) – Correct option receives score one, while incorrect options receives zero. After the display of PASSAGE **ONE or MORE** questions are presented with answer options for each question on subsequent screens. Each question receives a score one or zero.

On the DISPLAY SCREEN, there are one TEST TITEL filed, one QUESTION ID field, one QUESTION TEXT field and PASSAGE DISPLAY field. There is no SUBMIT button here.

On the Qn/Answer SCREEN, one QUESTION TEXT field and RESPONSE OPTION fields are given. It appears only after the DISPLAY SCREEN disappears.

NO REPEAT DISPLAY OF PASSAGE

Issue 2: On 'Details' page passage body is repeated. Repeat passage should be removed. See the screenshot.

PASSAGE BODY

Global warming, driven largely by human activities such as burning fossil fuels, deforestation, and industrial emissions, is one of the most pressing challenges of our time. Its effects ripple across Earth's ecosystems, altering the delicate balance that sustains life. Rising global temperatures accelerate the melting of glaciers and polar ice caps, leading to sea level rise that threatens coastal habitats and displaces both human and animal populations. Warmer oceans disrupt marine ecosystems, causing coral bleaching and the loss of biodiversity in reef environments that serve as nurseries for countless species.

PASSAGE BODY

Global warming, driven largely by human activities such as burning fossil fuels, deforestation, and industrial emissions, is one of the most pressing challenges of our time. Its effects ripple across Earth's ecosystems, altering the delicate balance that sustains life. Rising global temperatures accelerate the melting of glaciers and polar ice caps, leading to sea level rise that threatens coastal habitats and displaces both human and animal populations. Warmer oceans disrupt marine ecosystems, causing coral bleaching and the loss of biodiversity in reef environments that serve as nurseries for countless species.

Issue 3: Lengthy passage questions need to be formatted with paragraph, subtitle etc. Therefore, formatting facility should be provided.

Recommendation : This question type can serve multiple purposes, if it allows a feature for selecting '**Timer**' or '**No Timer**' facility. The current functionality allows setting a timer. While a passage question with timer makes the question much more complex, since the test taker has to remember contents in the passage. However, a question without timer makes it less complex, since he can read the passage again and again. The two situations serve two different purposes.

2. Admin User >> TakeAssessment >> MCQ-Passage Display (Ref: Career Judge_ Question Types Details, page 7, Section 1g)

Issue 1: Although the passage expires after the specified time duration, the test taker has an option to display it again. See the screenshot below. '**Show Passage Anyway**' allows him to see the passage again (any number of times). This feature should be disabled.

Passage display time has elapsed. The passage is no longer visible.

Show passage anyway

Read and understand the essay displayed below. You will get 4 minutes to read it. Then, you have to answer the questions based on the contents of the essay,

How does global warming affect coral reefs and thus Earth's ecosystem?

Issue 2: The 'Start Passage Presentation' button (shown in the screenshot below from QB Qn preview) needs to be enabled on TakeAssessment page. When the test taker clicks on the button, it displays. When the time expires, the display stops, and the passage can no more replayed.

Issue 3: Question Text1 should be above the passage field, while the question text2 is below the passage field.

Issue4. A click on *Previous* button should not allow a replay of the passage. Only Qn text and answer options shall be displayed. Test taker can modify his answer.

8. MCQ _ Image Display Question

1. Admin User >> QB >> AddQn >> MCQ-Image Display (Ref: *Career Judge_ Question Types Details, page 8, Section 1h*)

Issue 1: Timer feature is not available for limiting display duration. Display should be limited for a specified duration only, after which the image disappears. It cannot be replayed.

Confidential Document

1(h) Multiple Choice _ Image-Display _ Multiple Questions

Scoring: (0,1) – Correct option receives score one, while incorrect options receives zero. After the display of IMAGE, ONE or MORE questions are presented with answer options for each question on subsequent screens. Each question receives a score one or zero.

On the DISPLAY SCREEN, there are one TEST TITEL filed, one QUESTION ID field, one QUESTION TEXT field and IMAGE DISPLAY field. There is no SUBMIT button here.

On the Qn/Answer SCREEN, one QUESTION TEXT field and RESPONSE OPTION fields are given. It appears only after the DISPLAY SCREEN disappears.

NO REPEAT DISPLAY OF IMAGE

If clicked to come back to the question (from "NEXT Question page), only answer options are displayed. No REPEAT DISPLAY of the IMAGE is allowed

2. Admin User >> TakeAssessment >> MCQ-Image Display (Ref: *Career Judge_ Question Types Details, page 8, Section 1h*)

Issue 1: Multiple-answers question scoring issue. Apply the scoring rule for multiple-answers as explained earlier.

Score Summary		
TOTAL SCORE	PERCENTAGE	STATUS
1.0 / 1.0	100.0%	Pass

Issue 2. First Question text is jumbled up. ‘Note: images...” should be separated from the Question text by ‘insert line/para’. Text formatting is required at the question text fields.

You will see an image with a collection of daily use objects. Attentively observe the objects and answer the question that follows the display. Note: Images will be flash for a very short interval, and replay is not permitted.

Which objects did you NOT see in the image display?

- ☐ Dustbin
- ☐ Comb
- ☒ Chair
- ☐ Television
- ☒ Broom
- ☐ Umbrella

Issue 3. There should be a **play button** as in the case of flash questions. Only difference here is that the image stays for a specified duration, e.g., 30 seconds. After the expiry of the specified duration, the image disappears, and it cannot be played again.

Issue 4. Click on ‘Previous’ button shows the image of the previous question. Only the question text and answer options should be visible. The image should not be displayed.

9. Fill-in-the-Blank Type _ Multiple Fields Question

1. Admin User >> QB >> AddQn >> FITB Multiple Fields

Issue 1. Second Question Text field not available. Therefore, the question while presenting got jumbled up (see section screenshot under Issue 3).

Question type * 2b: FITB – Multiple F

Category Section 2 > Section

Difficulty Easy

Cognitive level Understanding

Question title * FTBM 01.01

This title identifies the question in lists and previews. It is not shown to candidates.

Question text * Fill in the blank with correct English usages

She _____ (decide) to _____ (leave) early because she _____ (not/feel) well.

Scoring type Binary (exact match)

2. Admin User >> QB >> Take Assessment >> FITB Multiple Fields

Issue 1. Score is not captured.

Issue 2. Results show total score for multiple field question as 1. Each answer field should receive a score of 1, and the total score should be total number of answers. In the sample question, there are 3 answer fields, therefore the total score for the question should be 3.

Issue 3. Question texts are jumbled up.

2b: FITB - Multiple Fields · Easy ☆ Bookmark

Fill in the blank with correct English usages She _____ (decide) to _____ (leave) early because she _____ (not/feel) well.

Field 1
decided

Field 2
leave

Field 3
did not feel

10. Fill-in-the-Blank Type _ Single Field Question

All issues from *Fill-in-the-Blank _ Multiple Fields* are applicable in this question type. Since there is only one answer field, the score is just 1.

11. Fill-in-the-Blank _ Flash Image Type Question with Multiple Fields

1. Admin User >> QB >> Create Qn >> FITB Flash-Image Question

Correct Answer(s)

Answer 1
Apple

Correct answers (one per line, up to 5)
Apple

PREVIEW

Flash items (1500ms each · 10 shown)

Issue 1. The purpose of the question is to assess the memory capacity of the test taker. The images are flashed, and the test taker is asked to recollect from memory how many items he correctly remembers from the list. Therefore, there should be as many answer fields as there are flash items. While adding answer options, the user should enter the names of all items in answer fields. For example, in the sample question below there are 10 images of vegetables; so, there should be 10 answer fields (e.g., Cabbage, Banana, Brinjal, Chilli, etc.). The score is the total of correctly entered answers. Each correct answer gets a score of 1.

Currently there is only one answer field. See the screenshot:

Reference: *Career Judge_ Question Types Details, page 12, Section 2d*

2(d) Fill-In-The Blank _ IMAGE Flash _ Multiple Fields

Scoring: (0,n) – Correctly filled options receives a score of one or more, while incorrect options receives zero. There are **TWO or MORE** fill-in-the-blanks in one question.

On the FLASH screen, there are one TEST TITEL filed, one QUESTION ID field, one QUESTION TEXT field and IMAGE FLASH field.

On the QN/Answer screen, one QUESTION TEXT field and RESPONSE OPTION fields are given. This screen is displayed after the FLASH screen disappears.

options are displayed. No replaying of the FLASH LIST is allowed

NO REPLAY OF FLASH LIST

2. Admin User >> Assessment >> TakeAssessment >> FITB Flash-Image Question

Issue 1. Score of correctly entered answer is not captured in results. For example, in the below example, one correctly entered answer (Apple) receives a score of zero.

Issue 2. Flash specifications as shown below are unnecessary details; therefore, hide them. (Applicable for Word Flash items also)

Issue 3. Play button is hardly noticeable. It should be bigger, and preferably placed at the center of the FLASH field. (Applicable for Word Flash items also)

The screenshot shows the interface for a '2d: FITB - Image Flash with Multiple Recall Fields' question. It includes a title bar, a 'Flash Items' section with specifications, a 'Play' button, a large central area for the flash, a 'Click Play to begin.' instruction, a 'Watch carefully' instruction, a 'Note' about the flash duration and replay, an answer field labeled 'Field 1', and a 'Replay' button. Annotations highlight several issues: 'Hide flash specifications' points to the 'Flash Items' section; 'Bigger Play button, preferably placed at the centre of the play field' points to the 'Play' button; and 'Replay is not permitted' points to the 'Replay' button.

2d: FITB - Image Flash with Multiple Recall Fields · Easy

Flash Items · 1500ms each · 10 shown (random order)

Play

Click Play to begin.

Watch carefully the images flashed and enter the names of as many images as you can remember. Note: Images will be flash for a very short interval, and replay is not permitted.

Field 1

Type your answer...

2d: FITB - Image Flash with Multiple Recall Fields · Easy

Flash Items · 1500ms each · 10 shown (random order)

Replay

Hide flash specifications

Bigger Play button, preferably placed at the centre of the play field

Replay is not permitted

Issue 4. Image display should be bigger. The test taker with vision limitation also should be able to view and differentiate the image displayed. (Applicable for Word Flash items also)

Watch carefully the images flashed and enter the names of as many images as you can remember. Note: Images will be flash for a very short interval, and replay is not

Issue 5. Flash **replay** should not be allowed. Disable 'Replay' (Applicable for Word Flash items also)

Issue 6. 'Field 1' etc. should not be shown here. (Applicable for Word Flash items also)

Issue 7. Answer field should have as many entry fields as there are flash items. For example, in the sample question, there are 10 flash items, and therefore, answer field should have 10 text entry fields. Test taker can enter answers in any order (as he remembers); and each correctly entered answer should be given a score of 1. Irrespective of the order of entry, all correct answers are given a score of 1 each. No negative score.

Reference: Career Judge_ Question Types Details, page 12, Section 2d

Recommendation: Test taker can add as many entry fields as he wants, but maximum capped at the total number of images displayed. That is, he cannot add more entry fields than the total number of images displayed during the flash presentation.

Issue 8. Question text should be above the Flash field, and there should be more space between Qn Text and Flash field. (Applicable for Word Flash items also)

12. Fill-in-the-Blank _ Flash Word Question with Multiple Fields

All issues from *Fill-in-the-Blank _ Flash Image Type with Multiple Fields*, except **Issue 1** in *Admin User >> Assessment >> TakeAssessment >> Match-the-Following Flash-Image Question*, are applicable in this question type.

In addition, there are following issues also.

Admin User >> Assessment >> TakeAssessment >> FITB Flash Image + FITB Flash Word

Additional Issue 1. When two flash questions are presented one after another, the first flash list repeats in the second question (instead of second flash list). No score was captured.

Additional Issue 2. When clicked on **Previous** button, it takes to the previous question and allows the test taker to play the question again, which is not permitted.

Ref: *Career Judge_ Question Types Details*, page 11-12, Section 2c and 2d:

Confidential Document

2(c) Fill-In-The Blank _ WORD Flash _ Multiple Fields

Scoring: (0,n) – Correctly filled options receives a score of one or more, while incorrect options receives zero. There are **TWO or MORE** fill-in-the-blanks in one question.

On the FLASH screen, there are one TEST TITEL filed, one QUESTION ID field, one QUESTION TEXT field and TEXT FLASH field.

On the QN/Answer screen, one QUESTION TEXT field and RESPONSE OPTION fields are given. This screen is displayed after the FLASH screen disappears.

Disable PLAY button for Previous Qn

If clicked to come back to the question (from "NEXT Question page), only answer options are displayed. No replaying of the FLASH LIST is allowed

NO REPLAY OF FLASH LIST

13. Match-The-Following Question Type

1. Admin User >> QB >> Create Qn >> Match-the-Following

Issue 1. Requirement specification (*Career Judge_ Question Types Details*, page 13, Section 3,) defines a Drag&Drop feature, where additional dummy (non-matching) options can be included. The current functionality does not provide this facility. Adding more dummy options makes the probability of guessing and getting correct answer more difficult.

Length of the match list may be more or less depending on the number of the match items included. Number of DRAG&DROP list will be more than the match list normally.

DRAG & DROP List from which candidate has to select correct options matching with Group A list and place in Group B list

Recommendation. Provide an 'Add Dummy Option' button on the CreateQn page, by which the user can add dummy options to the Group-B list. Adding dummy options is optional. When Group B items are shuffled, correct items plus dummy items will be shuffled.

A sample is shown below:

+ Add pair

PREVIEW

Group A	Group B (shuffle at delivery)
The largest planet in our solar system	Jupiter
The inventor of the telephone	Alexander Graham Bell
The capital city of Japan	Tokyo
The currency of the United Kingdom	Pound Sterling
The author of Harry Potter series	J.K. Rowling
The national animal of India	Bengal Tiger

Alexander Hawthorn

Venus

2. Admin User >> Assessment >> TakeAssessment >> Match-the-Following Question

Issue 1. Group B items are not shuffled. Shuffling should be enabled.

3: Match-the-Following - Easy ☆ Bookmark

Select the correct answers from Group B by matching the items on Group A.

Click an item from Group A, then click the matching item from Group B.

GROUP A	GROUP B
The largest planet in our solar system	Jupiter
The inventor of the telephone	Alexander Graham Bell
The capital city of Japan	Tokyo
The currency of the United Kingdom	Pound Sterling
The author of Harry Potter series	J.K. Rowling
The national animal of India	Bengal Tiger

14. Grid Selection Question Type

1. Admin User >> QB >> Create Qn >> Grid Selection

Question Text – Optional field is not visible. This field should be enabled. See the screenshot below

Question title *

GRDT 01.01

This title identifies the question in lists and previews. It is not shown to candidates.

Question text *

Which tools are used for metal turning? (Select your answers from the Grid List.)

Grid rows

3

Grid columns

3

2. Admin User >> Assessment >> TakeAssessment >> Grid Selection Question

Issue 1. Options marked correct do not get their respective score. See the screenshot below. Here, the user selected 5 options (tick marks); all are correct, but results show zero score.

Issue 2. Total mark (five correct answers) should be 5, but results show 9 (i.e., total number of grid cells including incorrect options). Negative marking should be (-1) for each incorrect option selected.

Which tools are used for metal turning? (Select your answers from the Grid List.)

Which tools are used in metal turning?

Select the correct cells by checking the boxes:

	Col 1	Col 2	Col 3
Row 1	Facing Tool ☒	Parting Tool ☒	Planer Tool ☐
Row 2	Threading Tool ☒	Broach ☐	Reamer ☒
Row 3	Taps & Dies ☐	Knurling Tool ☒	Shaper Tool ☐

4: Grid-List Selection · Easy ☆ Bookmark

Which tools are used for metal turning on a lathe?

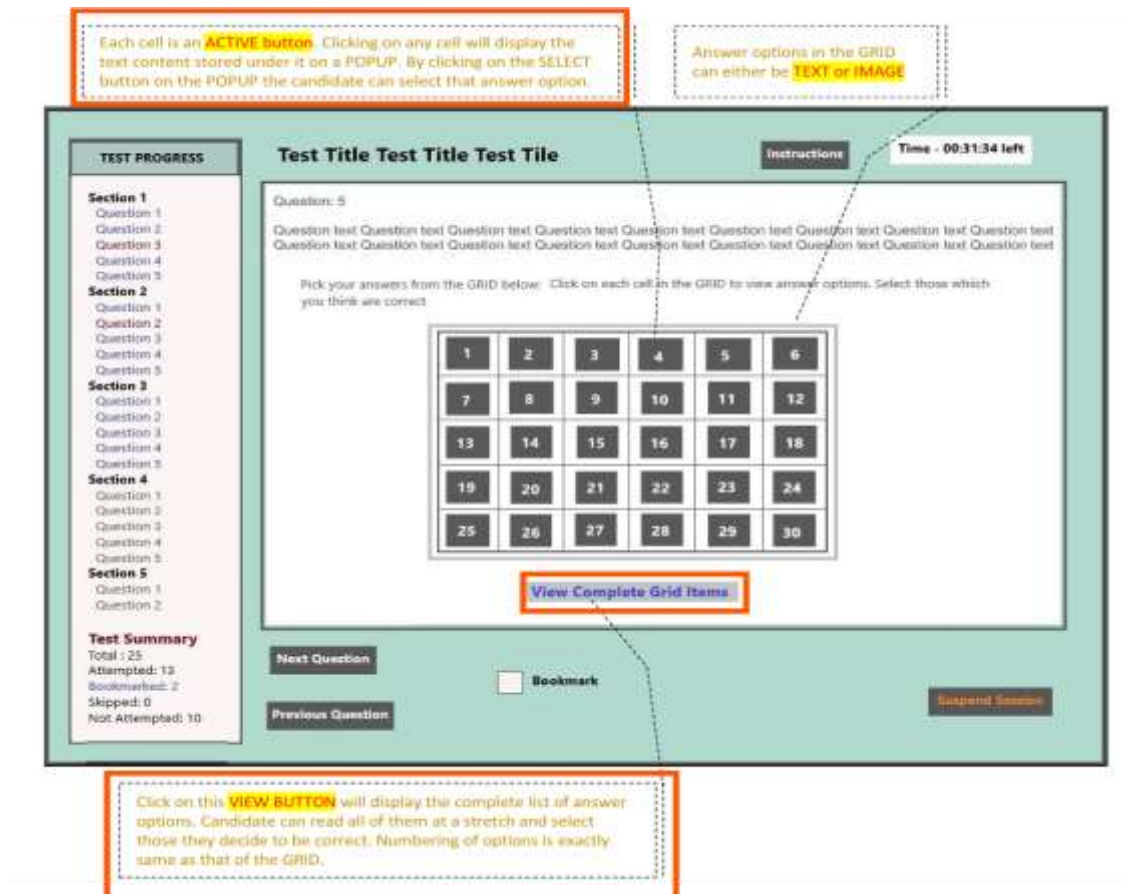

Select the correct cells by checking the boxes:

	Col 1	Col 2	Col 3
Row 1	 ☐	 ☐	 ☐
Row 2	 ☐	 ☐	 ☐
Row 3	 ☐	 ☐	 ☐

Issue 3. Hide column/row names. They are unnecessary details and may be confusing.

Issue 4. Images are too small. A click and popup feature will allow the user to view the image properly. The button-format as presented in **Issue 5** will solve this problem.

Issue 5. The requirement document, *Career Judge_ Question Types Details, page 14, Section 4*, recommends a numbered button-grid display style. See below the screenshot from the Ref doc.

Recommendation: While the current display format (showing the options directly inside grid cells) is suitable for one-word or short phrases or small images, it will not be suitable for long sentences or bigger images. If there are many sentences to be entered in the grid cells, it will become unmanageable, not user-friendly, and clumsy. The idea of showing it in a numbered button-format is to accommodate many options. Clicking on a cell displays the option in a popup, or if the test taker wants to view the entire list of options, he can click on 'View Complete Grid Items' button. Moreover, the button-format has a modern aesthetic appeal. (Sophisticated and aesthetic presentation matters a lot in today's competitive market.)

1. HotSpot Question Type

1. Admin User >> QB >> Create Qn >> Hotspot-Multiple Answers (Ref: Career Judge_Question Types Details, page 16, Section 5.b.)

Issue 1. Each correct selection should be given a score of 1. Thus, if there are three correct answers, then each correct selection receives a score of one, and the total score for the item becomes 3. Each incorrect selection should receive a negative score of 1, but minimum score is zero, not a negative value.

See below the reference document, Career Judge_Question Types Details, page 16, Section 5.b

5(b) HOT-SPOT Selection _ Multiple Answers under One Question

Scoring: (0,n) – Each correct **CLICK-SELECTION** selected will be assigned a score of **ONE**. Each incorrect **CLICK-SELECTION** will be given a **NEGATIVE ONE** (-1). Thus if the candidate selects 4 HOTSPOTS and one NON-HOTSPOT, he will get a score of 3. However, if the number of incorrect CLICK-SELECTIONs is greater than the number of correct ones, then NO NEGATIVE score is assigned, instead a score of zero is assigned for that question.

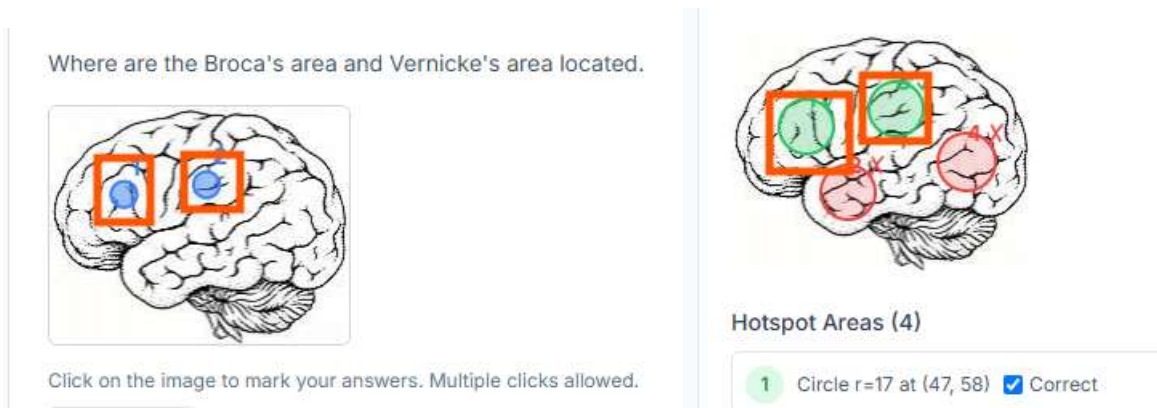

Note: Ref document says 'NO NEGATIVE score is assigned'. This is for single answer option case.

Recommendation. Give two options at the time of Qn-Adding (*CreateQn* page). The user can select one. Transparent feature will present the question during Take Assessment without showing the HotSpot areas, whereas the second feature will show them.

- 1) **Spot-marking Transparent**, as currently available, where spot-marking is not visible to the test taker. He should know the exact location and click. At the same time, the spot-marking should be exact enough to capture the click. (Current version)
- 2) **Spot-marking Visible**, where the spot-marking is visible to the test taker. He can click on any of the marked spots. (Earlier version)

2. Admin User >> Assessment >> TakeAssessment >> Hotspot-Single/Multiple Answers

Issue 1. Clicking on the exact spot does NOT give a correct score. Tried to position the cursor on exact spot. See the comparison images from *TakeAssessment* page (image 1) and *QnAdd* page (image2). The user clicked exactly on the defined hotspot, but results show zero score.

Issue 2. Two images are shown on the testing page. User gets confused about which one to click. Only one (second) image is necessary. First (smaller image) can be removed. Second image is correct one, because it is below the question text.
