

1. Corporate Admin User

Corporate Admin User is the admin representing an organization which has a service delivery contract with Career Judge (CJ). The corporate admin user is responsible for user management of those employees who use the assessment/training/counselling services from Career Judge. CJ Admin should tag/link relevant organization to a Corp admin user and assign relevant rights according to organization's specific requirement. *Note: Every time an organization is added to the system, a Corp Admin user is also be added and tagged to that organization.*

Ref: User Details Doc (PPT), slide 3, sent on 06-04-2026 on WhatsApp

User 3: Corp Admin User

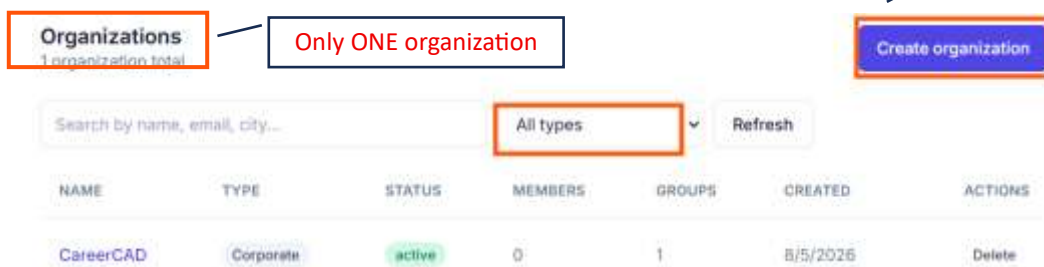

Issue 1. Corp Admin cannot create an organization. It is the right of the CJ Admin. Therefore, the button **'Create Organization'** is irrelevant and need to be removed.

Issue 2. Corp Admin can view **ONLY** the organization he is tagged to and responsible for. Corp Admin can create groups and group admins under this organization **ONLY**. He cannot select any organization in the system and add groups. Currently, all organizations in the system are visible to him and he can add groups to any organization in the list (*Add Group* and *Add Member* are currently disabled).

Cannot Create Organization

Ref: Corporate Admin >> Organizations >> Search Organizations

Issue 3. Currently, Corp Admin CANNOT add groups. The feature is disabled. He should be able to add/delete groups to the organization he is tagged to.

Ref: Corporate Admin >> Organizations >> Search Organizations >> Add Group

Groups

NAME	MEMBERS	CREATED	ACTIONS
Group 1	0	8/5/2026	Delete

Currently disabled

Issue 4. There is no facility to add/delete and tag group admin to the organization. The feature should be enabled. Group Admins should be tagged to specific groups. A group admin has rights only on the group he is tagged to. Name, official E-mail id, Employee ID, Region/Division are the fields to be entered while adding a new Group Admin. (Ref: Module-wise Doc, Admin User _ System Administration Process, page 2, section 2.3)

Issue 5. Corp Admin should be able to permit right to the group admin to view/download assessment reports of *Corp Individual users*. Enable the feature.

Issue 6. Corp Admin can add Corp individual users to any group under his supervision (within the organization) on his own. This feature is currently disabled. Name, official E-mail id, Employee ID are the fields to be entered while adding a Corp individual user to any group. These features are not available.

Issue 7. He should be able to bulk-upload Corp Individual users under his organization. Facility to tag individual users to any specific group should be available. Currently, it is not available.

Ref: Corporate Admin >> Organizations >> Search Organizations >> Add Member

Members

Add member

Currently disabled

Issue 8. **Create User** feature should not be available to the Corp Admin. Corp Admin cannot add users to the system. He can add his organization's members only, tagging them to the organization and to a specific group. This facility is already there in *Add Member* function.

Repetition of 'Add Member'

Issue 9. Corp Admin should not view any other users in the system other than those whom he has added under his organization. The facility should be disabled.

Issue 10. Corp Admin can view ONLY those assessments which are assigned to his organization. He does not have the right to view all CJ assessments. Currently, he can view any assessment in the system.

Issue 11. Corp Admin does not have the right to take an assessment. Currently, *Take Assessment* feature available. It should be disabled. (If he wants to take an assessment, he has to create a Corp individual user and take the assessment in that mode.)

Issue 12. Only published assessments assigned to the organization can be viewed. Assessment specifications such *status*, *navigation* are not relevant for the user, so they should not be shown.

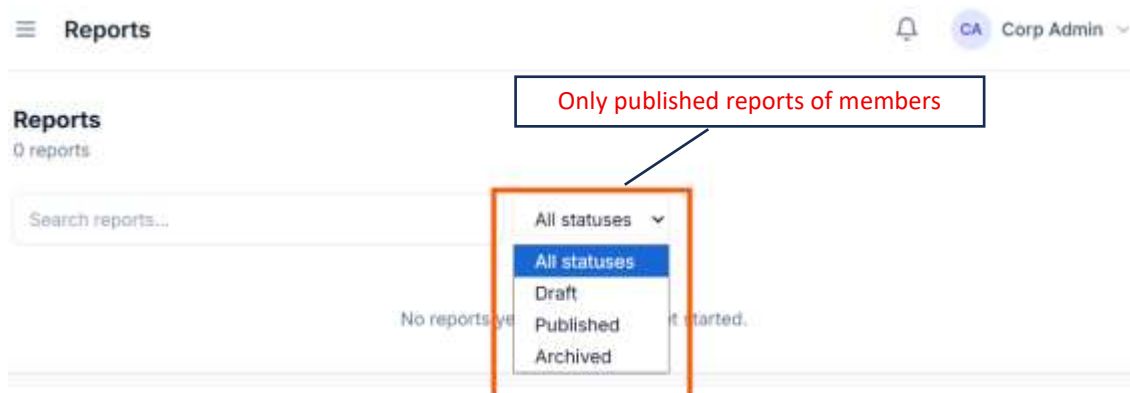

Ref: Corporate Admin >> Assessments

Issue 13. Corp Admin does not have the right to create assessment, so the button **Create Assessment** should be disabled.

Issue 14. Corp Admin does not have right to view all reports in the CJ system, but ONLY the **published reports** of members of his own organization. Currently, all reports of all types are available to him.

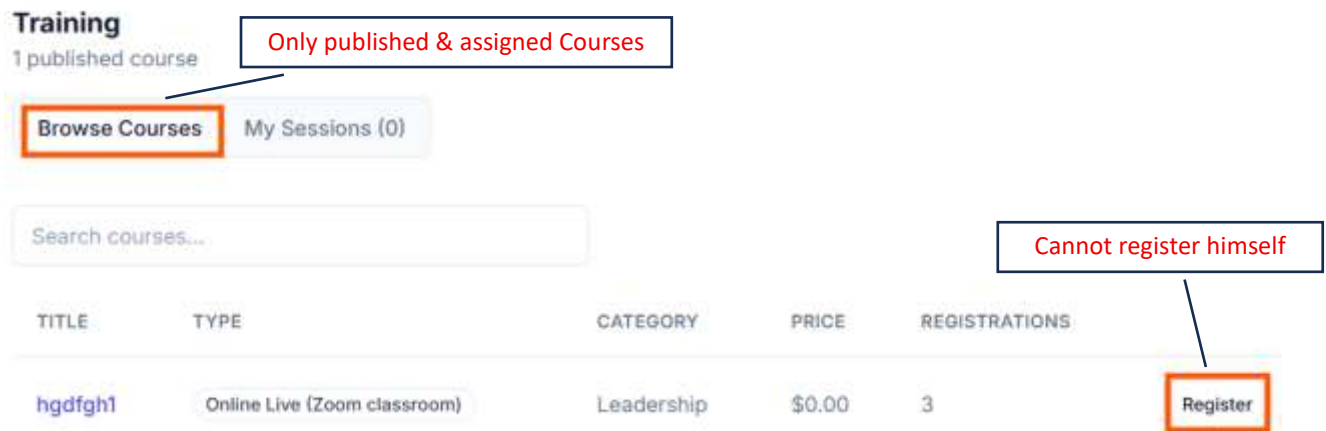

Ref: Corporate Admin >> Reports >> Search Reports

Issue 15. He should be able to view/download reports that belongs to the members of his organization.

Issue 16. As in the case of assessments, only those **published** training courses to which the organization have subscribed can be shown on the Corp Admin's *Training* page. Currently, all trainings from all categories are viewable to the Corp Admin.

Ref: Corporate Admin >> Training >> Browse Courses

Issue 17. Corp Admin can directly assign/remove Corp Individual users of his organization to any trainings subscribed by the organization. Enable this feature.

Issue 18. He should be able to bulk-upload Individual users to any specific group. The facility is not currently available. Enable this feature.

Issue 19. He can schedule/reschedule/cancel training courses for any Corp individual user in the organization. Currently not available, so enable this feature.

Issue 20. He does not have the right to register himself for any courses. If he wants, he has to add himself as a Corp individual user and assign any course to this user account. Currently, he can register himself for a course. Disable the feature.

Issue 21. Instead of My Sessions which provides status details of his own sessions, it should provide status details of members of the organization who are assigned to any course.

Ref: Corporate Admin >> Training >> My Sessions

Issue 22. Corp Admin should have access to CJ's counselling services. He can schedule/reschedule/cancel a counselling session with any of the counsellors empaneled with CJ. Currently, this facility is not available. Enable this feature.

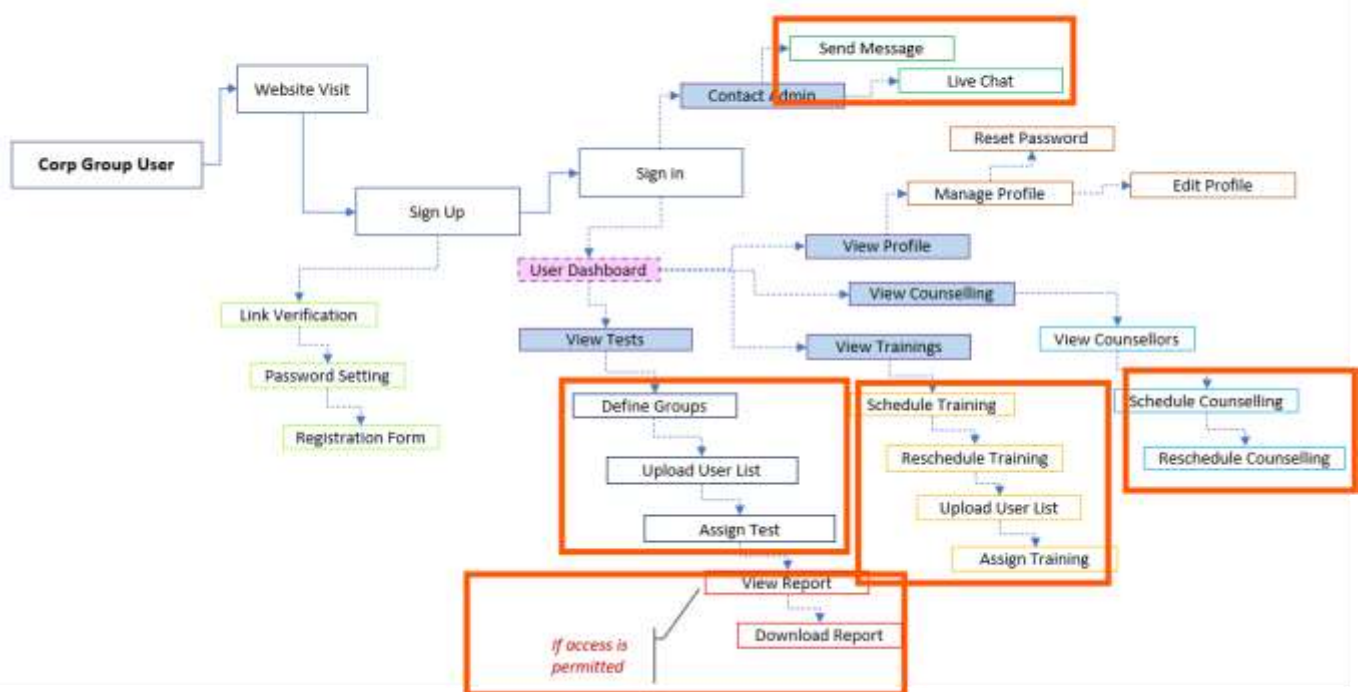

Issue 23: Corp Admin should be able to send/receive messages (live-chat) to/from the CJ Admin/ Helpdesk. The facility is currently not available. Enable this feature.

2. Corporate Group Admin

Corporate Group Admin is the admin at the group level within a specific organization. Corp Admin adds/assigns/tags Corp Group Admin to a specific group. Corp Group Admin has authority only over his group. He does not have any direct authority over other groups or their members in the organization.

Ref: User Details Doc (PPT), slide 4, sent on 06-04-2026 on WhatsApp

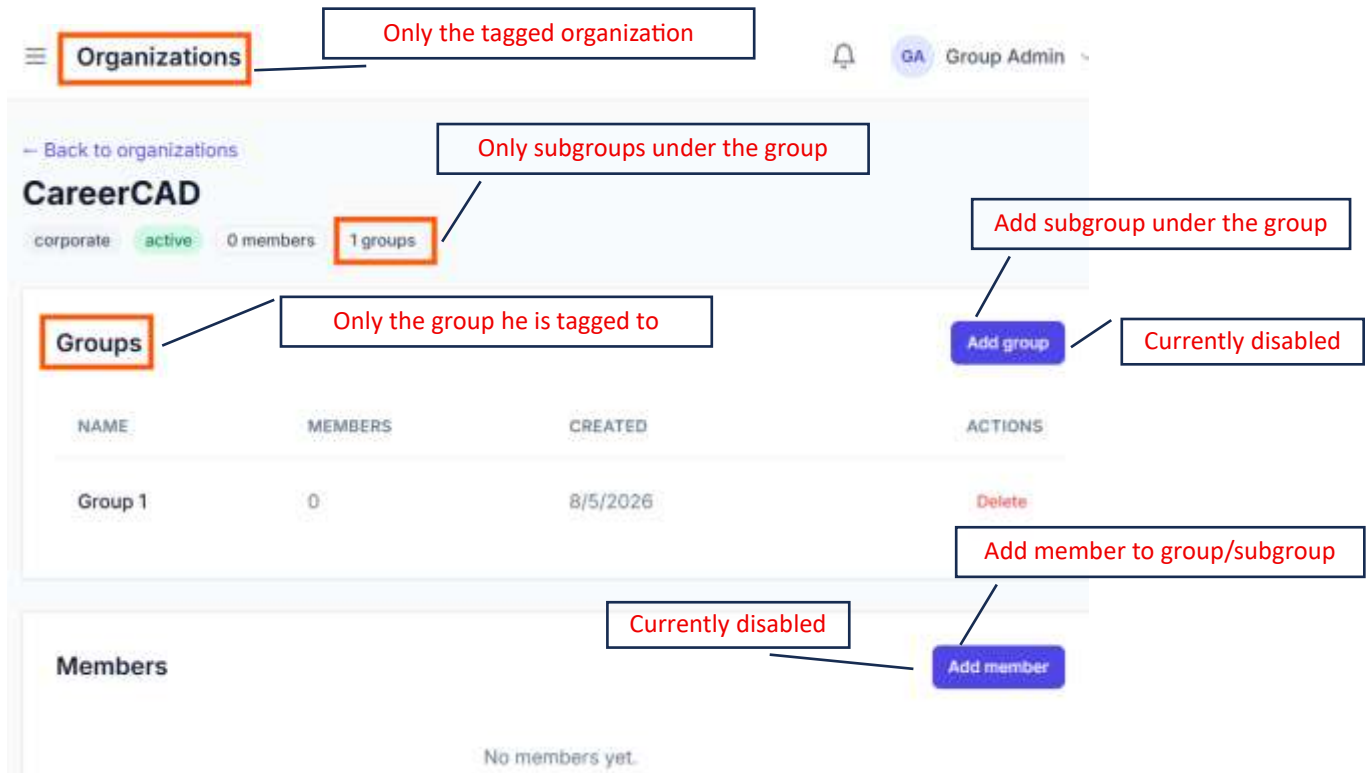

User 4: Corp Group User

Issue 1. Corp Group Admin cannot create an organization. It is the right of the CJ Admin. Therefore, the button '**Create Organization**' is irrelevant and need to be removed.

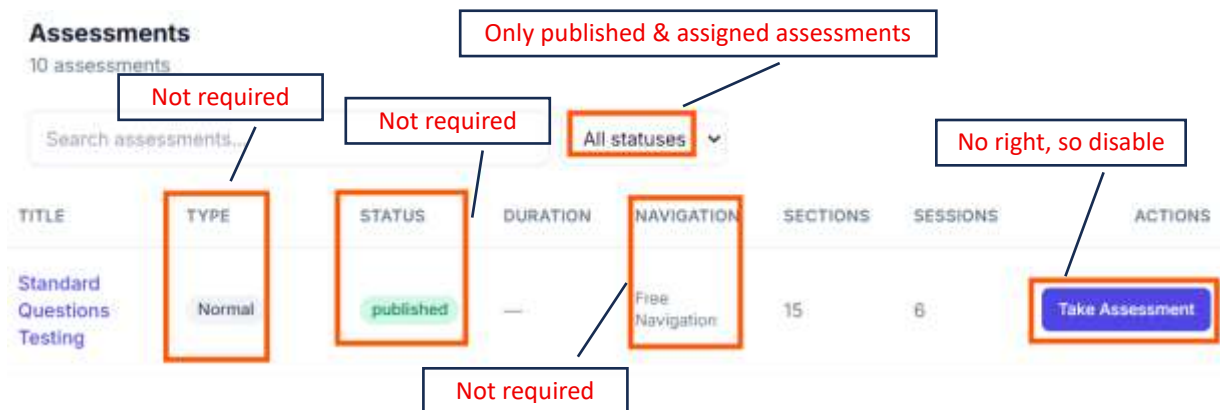

Issue 2. Corp Group Admin can view ONLY the group he is tagged to and responsible for. He can create subgroups under this group. But he cannot select any group under the organization and create subgroups. Currently, all organizations in the system are visible to him and he can add groups to any organization in the list (although *Add Group* and *Add Member* are disabled).

Issue 3. He can add/delete and assign/tag Corp Individual users (employees working under him) to his group or sub-groups under this group. Name, official E-mail id, Employee ID are the fields to be entered while adding a Corp individual user to a group. Enable these features. (Ref: Module-wise Doc, Admin User _ System Administration Process, page 2, section 2.3)

Issue 4. He should be able to bulk-upload Corp Individual users under his group. Facility to tag individual users to any specific group should be available.

Issue 5. Corp Group Admin have right to view **ONLY** the assessments which are assigned to the organization. Currently, all assessments of all statuses are available to the user.

Issue 6. Group Admin do NOT have right to **take assessment**. Currently the feature is available to him. It should be disabled.

Issue 7. He can assign/tag/remove Corp individual users under him to any of the assessments that are available to the Organization.

Issue 8. Assessment details such as type, status, navigation are not relevant information for the user and therefore not required. Disable them.

Issue 9. Group Admin should be able to view/download published reports of members in his group, *if Corp Admin has given him the right*. Currently this feature is not available. Enable this feature.

Issue 10. Group Admin should be able to view training courses assigned to the organization. Currently this feature is not available. Enable this feature.

Issue 11. He should be able to assign (remove) those training courses to members of his group. This feature is not currently available. Enable it.

Issue 12. He does not have the right to register himself for any courses. If he wants, he has to add himself as a Corp individual user and assign any course to this user account. Disable it.

Issue 13. Group Admin should be able to view counselling services/counsellors and schedule/reschedule/cancel those services on behalf of members of the group. These facilities are currently not available. Enable them.

Issue 14: Group Admin should be able to send/receive messages (live-chat) to/from Corp Admin, CJ Admin/ Helpdesk. The facility is currently not available. Enable this feature.

3. Corporate Exclusive Admin

Corporate Exclusive Admin is the admin for an entire organization which needs an exclusive platform where they can manage their own Assessments/Trainings. They use CJ's technology but manage all contents themselves. They can create an exclusive website for this operation. They can create their own assessments and training courses. CJ Admin permits them relevant rights depending on their requirements. However, **they should have NO ACCESS to CJ's contents** (question bank/training courses). **No one, including CJ Admin, should have ACCESS to the exclusive platform's contents or users.** Ref: Corporate Exclusive User (PDF, part of SRS), sent to sanjayaluva@gmail.com on 12-03-2024)

Issue 1. CJ Admin creates the Organization that the Corp Excl Admin should be tagged to.

Issue 2. CJ Admin adds/edits/deletes the Corp Exclusive Admin and tag him to the Organization. Currently the tagging feature is not available.

Issue 3. CJ Admin assigns Assessment and/or Training module rights to the Corp Excl Admin in a customized manner (depending on their requirements of his organization). He can select various Assessment-module and/or Training-module rights and assign to the Corp Excl Admin. Currently, this feature is not available. List of permissible rights are presented below:

Under Question Bank module

1. Selected question types (as per Organization's requirement)
2. Add/edit/delete Qn features for selected question types, including score assignment and preview
3. Category definition features
4. Assessment configuration features such as Assessment Definition, Section Definition, Question Assignment, Display Order, Timer Setting, Navigation Features

5. General reporting features, such as Report Type selection, Converted Score Selection, Layout Setting features, report view/download permission

Under Training Module

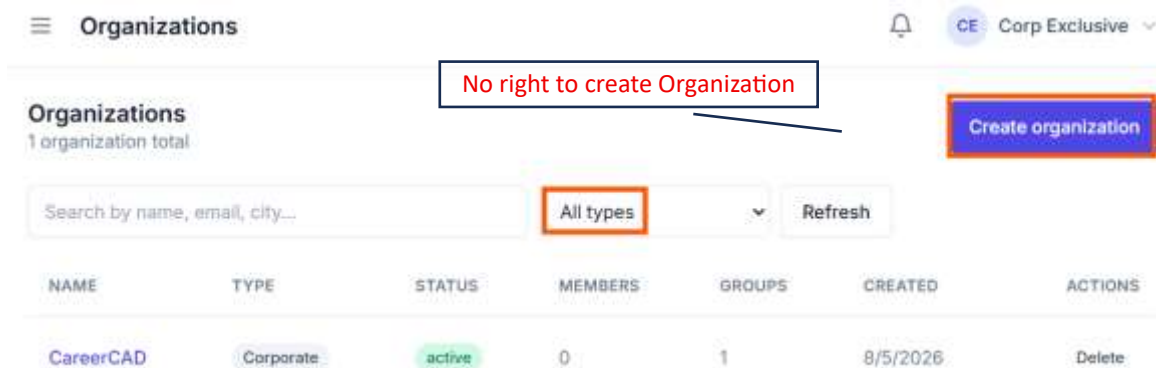

1. Selected training course types (as per Organization's requirement)
2. Training course structure and content features according to the selected course type
3. Scheduling/rescheduling/cancelling features for the selected course types

User Creation/Management Module

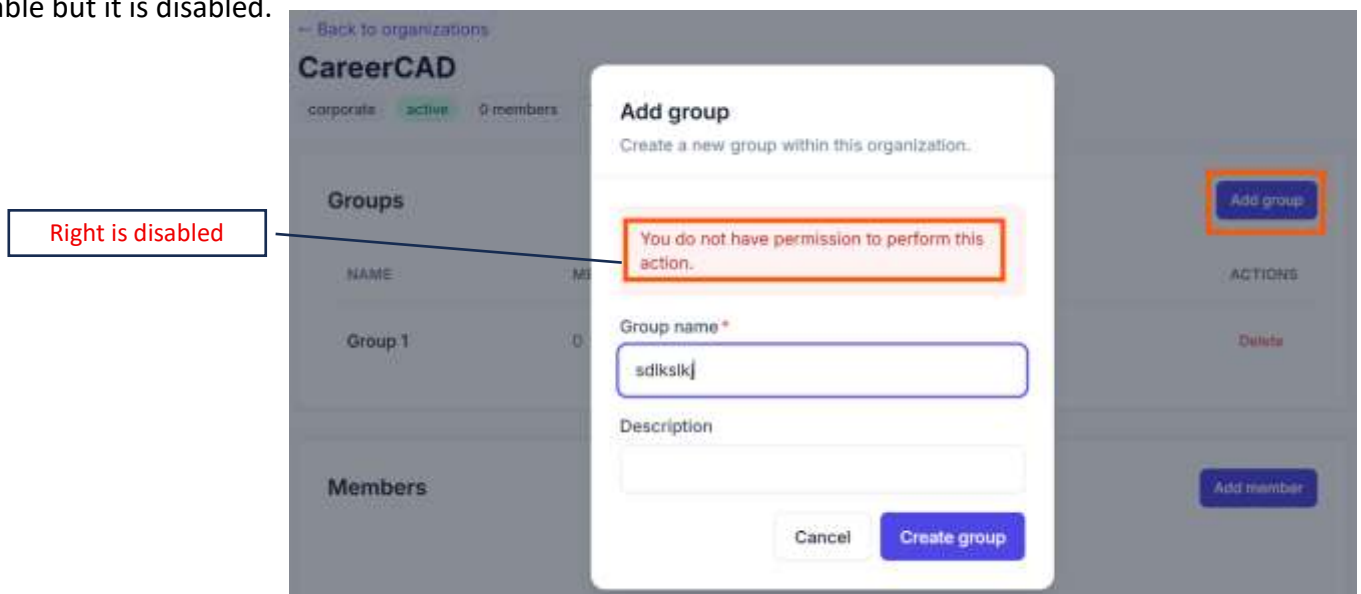

1. Add/edit/delete/bulk-upload user features (Corporate Individual users), tagging users to groups, assessments or training courses
2. Group and Group Admin creation (add/edit/delete) features and tagging them to groups

Note: Modules such as Question Review process, Psychometric analysis, Profiling Solution, Counselling, task management process, Registration process are not included for right assignment by the CJ Admin for the Corporate Exclusive user.

Issue 2. Corp Excl Admin cannot create organization. CJ Admin has the right to create the organization he represents. Currently, there is a button **Create Organization** (although disabled). Since the user does not have right for this feature, it should be removed.

Issue 3. Corp Excl Admin can add/edit/delete groups within the organization. Currently, the feature is available but it is disabled.

Issue 3. Corp Excl Admin can add/edit/delete group admins and tag them to specific groups. Entry fields include *Name, official E-mail id, Employee ID, Region/Division*. Currently, *Add Group Admin* feature is not available. *Group Admin should be tagged to a group*. These features should be enabled.

Following are Group Admin's rights:

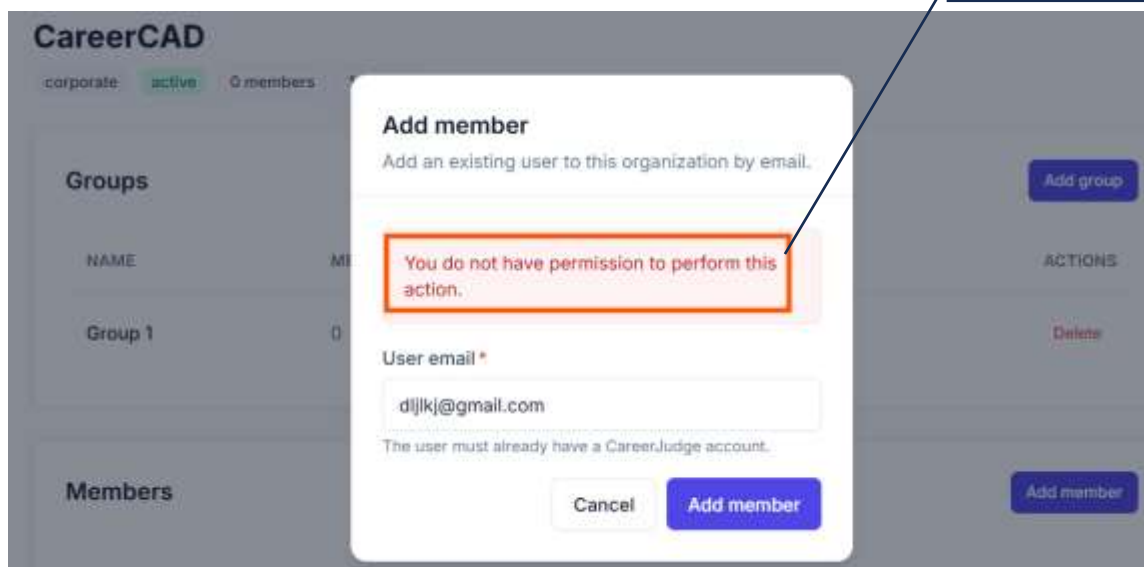

Group Admin can *add/edit/delete/bulk-upload* Corp individual users to the group he is tagged to.

Group Admin can *tag members* of his group to permitted assessments

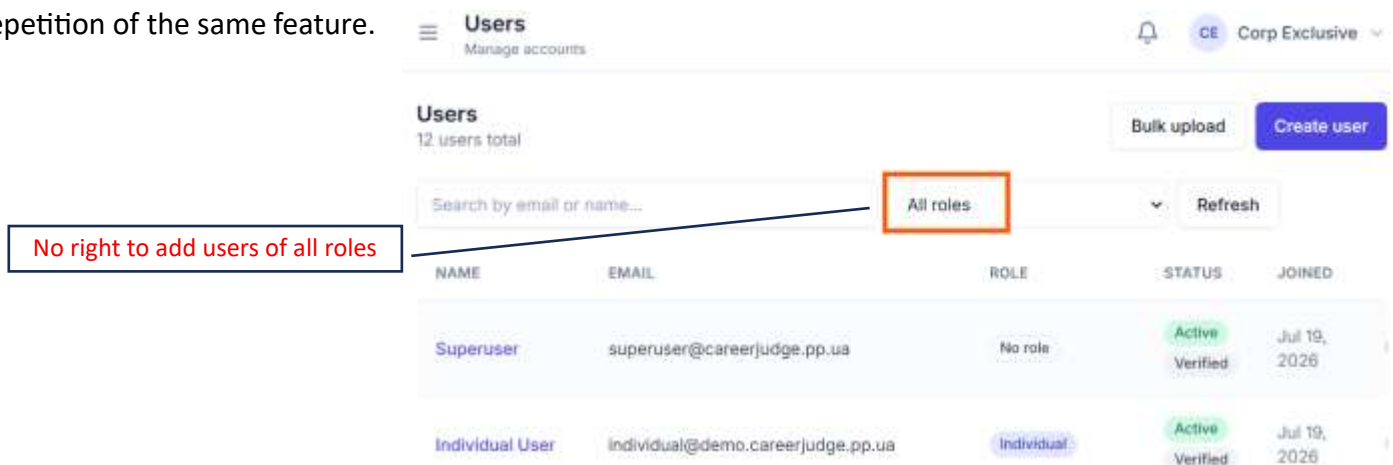

Group Admin can tag members of his group to permitted training courses and schedule/reschedule/ cancel courses.

Group Admin can *view/download* assessment reports of members of his group, if Corp Exclusive Admin has permitted the right.

Issue 4. Corp Excl Admin can *add/edit/delete/bulk-upload* individual users to any group in the organization. Entry fields include *Name, official Email ID, Employee ID*. *Add Member* button is available, but it is disabled. It is not clear whether members are tagged to a group or not. Enable *Add Member* and *Tag Member to Group* features.

Issue 5. Currently, Corp Excl Admin can add users of different roles. This is not permitted. He can add only Corp Group Admins and Corp Individual Users to his organization (not to the CJ's user data base). Already *Add Member* facility is available (although currently disabled), so an additional user creation facility is only a repetition of the same feature.

Issue 6. Corp Excl Admin can tag Corp individual users to permitted assessments or training courses

Issue 6. Corp Excl Admin can tag Corp individual users to permitted training courses and schedule/reschedule/ cancel courses.

Assessment Creation & Reporting

Issue 7. Corp Excl Admin can add categories/subcategories for adding questions

Issue 8. He can add/edit/delete questions (independent QnBank, not linked to CJ's QnBank) of permitted question types

Issue 9. He can configure assessments. Currently, assessment rights are not assigned to the user.

Issue 10. Currently, Corp Excl Admin can view and take all types of assessments on CJ's system. He CANNOT view/take any of CJ's assessments. They have their exclusive platform and environment where they can create their own assessments and training courses, using CJ's technology.

Issue 11. Corp Excl Admin can configure reports including parameter setting and report layout setting.

Issue 12. Selection of report types should be based on the type of question types assigned to the organization. For example, if forced-choice question type is not assigned to the organization, then **typological report type** shall not be available for selection.

Issue 13. Currently, he can view all types of reports in the CJ's systems. This is not permitted. He can view/download only those reports within their exclusive platform (created by their own team).

Issue 14. He can view/download assessment reports available within the organization's exclusive platform (not the reports of the CJ's platform). That is reports of their own members.

Issue 15. He can assign rights to Group Admin to view/download reports. Currently, this facility is not available.

Setting up & Scheduling Training Courses

Issue 16. Corp Excl Admin can set training courses on their exclusive platform, using CJ's technology. Currently, features related to Training creation are not available. They should be enabled.

Issue 17. Corp Excl Admin can select permitted course types and configure training courses independently, including Course Structure, Content Creation, Scheduling Process, Course Completion Parameters, and Notification process.

Setting up Custom Webpage

Create Website

1.0 Requirement specification

1.1 Requirement Traceability

1.2 Requirement description

The scope of the usecase begins when the user logs in to the system and choose to create website for corporate Exclusive and the scope of the usecase ends when the user created a website for the Corporate Exclusive.

2.0 Functional specifications

Create Website: CJ_UC055	
Actor	Career Judge Admin
Pre-conditions	User logged in to the system
Post-conditions	A Website has been created for Corporate Exclusive
Frequency	Adhoc
Actor actions	System response
1. User selects the relevant function	2. System displays the available layout for the website.
3. User selects the layout and save.	4. System creates a website URL, separate database and generates credentials for the admin.
* Exception or Alternate Flow	
Business rules	1. The Corporate Admin login should have the menu to configure the website. 2. A separate database should maintain for the generated website. 3. Corporate admin should be able to change the username and password for the database access of their customized website.
Notes	►
Acceptance criteria	1. Check if the list of layouts are displayed while selecting the page customization.

Separate Database

Available Webpage Layouts

As pointed out above, Corporate Exclusive platform should function independently from the CJ's platform. As per the SRS Doc *Corporate Exclusive User (PDF, part of SRS)*, sent to sanjayaluva@gmail.com on 12-03-2024, the corporate exclusive platform is configured on a customized Website/Webpage and separate database with unique credentials for the Corp Excl Admin.

Note: There is no a clear understanding of the technical details of this process (as recommended by the technical team which prepared the SRS Doc). Appropriate solution for setting up exclusive environment needs to be finalized after necessary discussion.

Issue 18. CJ Admin can set up Webpage layout or select one of the available layouts and custom-create a Webpage for the organization's exclusive platform.

ends when the user customized the page.

2.0 Functional specifications

Customize Page: CJ_UC054	
Actor	Corporate Exclusive Admin
Pre-conditions	User logged in to the system
Post-conditions	User customized the web page. Input logo, company name, etc.
Frequency	Adhoc
Actor actions	System response
1. User selects the relevant function	2. System displays the available layout
3. User selects the layout and input the logo and other required fields, chooses to save.	4. System displays the customized page.
* Exception or Alternate Flow	
Business rules	1.
Notes	►
Acceptance criteria	1. Check list of layouts are displayed while selecting the page customization. 2.

Issue 19. Corp Excl Admin selects a customized webpage layout and input company logo and company name.

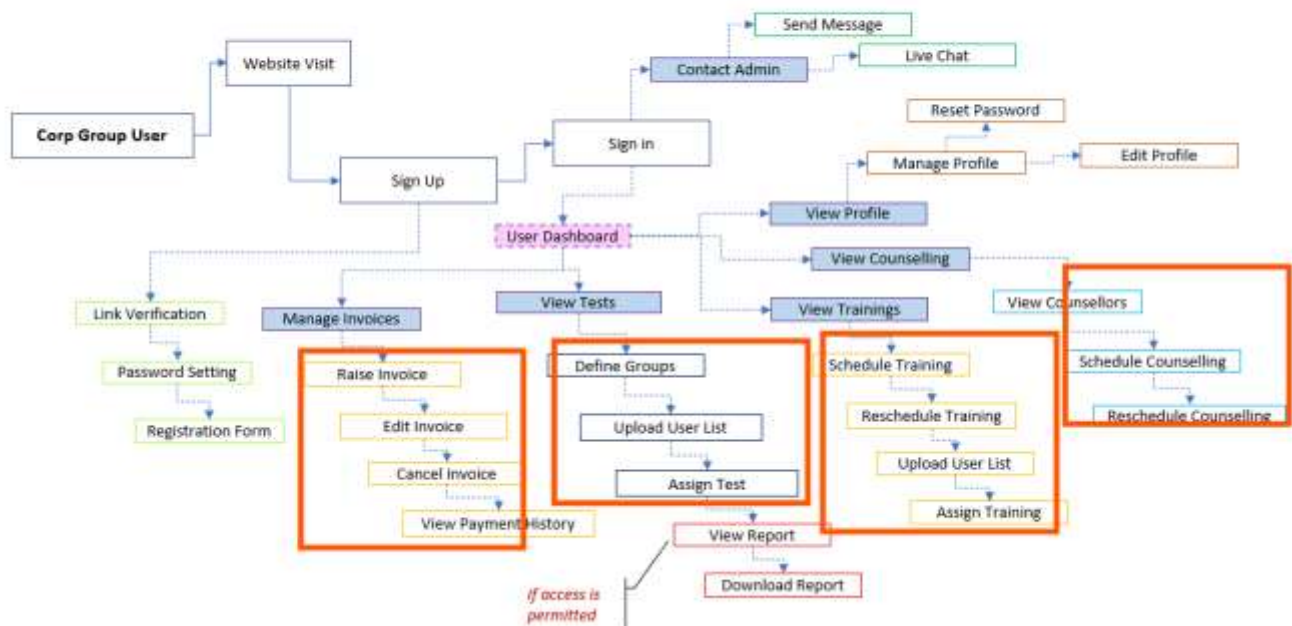

Issue 20: Corp Excl Admin should be able to send/receive messages (live-chat) to/from CJ Admin/ Helpdesk. The facility is currently not available. Enable this feature.

4. Channel Partner

Channel Partner is the user who has a business tie-up with CJ. He works as a marketing partner of CJ and recruits individual/corporate users for CJ's assessment, training and counselling services. He is responsible for those whom he recruits and have rights to add those users and manage service delivery for them. His rights are limited to those whom he recruits. Like in the case of Corp Admin and Corp Excl Admin, CJ Admin creates an organization for a *Channel Partner* and assign rights as per requirements.

Ref: User Details Doc (PPT), slide 4, sent on 06-04-2026 on WhatsApp

User 5: Channel Partner

Issue 1. Channel partner does NOT have right to create organization. Only the organization created for him is viewable. Channel partner is tagged to this organization. Currently, he can view all organizations in the CJ system and create new organizations (although disabled). Disable these features.

Issue 3. He can add/edit/delete Group Admins within his organization and tag them to any of the groups. These features are currently not available. Entry fields include Name, E-mail id, Mob Number, Institution Name, Place. They should be enabled.

Group admins can add/edit/delete and tag individual users to the group he is responsible for.

He can assign assessments/ training courses which are permitted to the channel partner.

Issue 4. Channel partner can add/edit/delete members (individual users) and tag them to any of the groups. Currently, **Add Member** feature is available, but it is disabled. Name, E-mail id are the fields to be entered while adding an individual user to any group. These features should be enabled. *Note: Each member who is added should be tagged to a group within the organization.*

Issue 5. He can bulk-upload Individual users under any group. Currently, this feature is not available. Enable the feature.

Issue 6. **Create User** feature should not be available to the Channel Partner. He does not have right to add users to the CJ's user system. He can add individual users to any group within his organization.

Issue 7. Channel Partner should not view any other users in the system other than those whom he has added under his organization. The facility should be disabled.

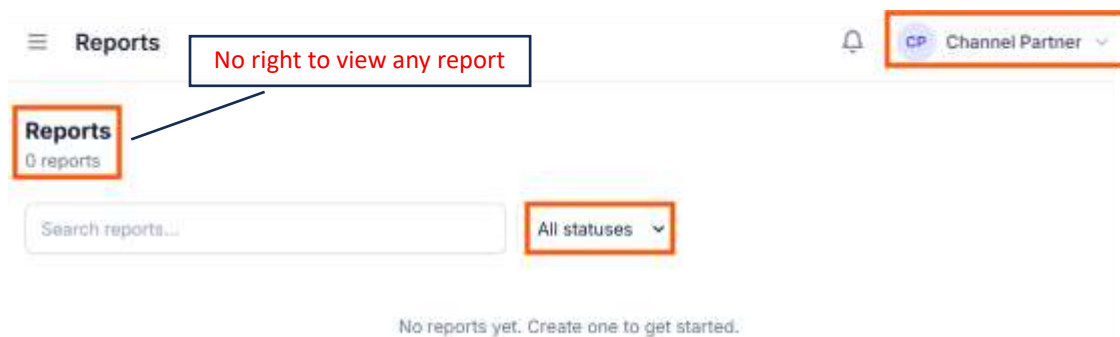

Issue 8. He can view ONLY assessments assigned to his organization. Currently, he can view all assessments in the system.

Issue 9. Channel Partner does not have the right to take an assessment. Currently, *Take Assessment* feature is available. It should be disabled.

Issue 10. Only published assessments assigned to the Channel Partner can be viewed. Assessment specifications such *type*, *status*, *navigation* are not relevant for the user, so they should not be shown.

Issue 11. Channel Partner does not have right to view all reports in the CJ system. Currently, it is available. Disable it. *Note: He does not have right to view reports of individual users tagged to his organization.*

Issue 12. Channel partner can view *published* training courses which are assigned to him. Currently, the feature is not available. Enable it.

Issue 13. He can assign/remove Individual users to any permitted training courses. This facility is not available. Enable this feature.

Issue 14. He can schedule/reschedule/cancel training courses for any group member. Currently this feature is not available. Enable it.

Issue 15. Channel Partner should be able to view training session status details individual user members.

Issue 16. He should have access to CJ's counselling services. On behalf any member, he can schedule/reschedule/cancel counselling session with any of the counsellors empaneled with CJ. Currently, this facility is not available. Enable this feature.

Issue 17: He should be able to send/receive messages (live-chat) to/from the CJ Admin/ Helpdesk. The facility is currently not available. Enable this feature.

Issue 18. He can create/revise/cancel an invoice and send it to the CJ Admin for payment. The facility is currently not available. Enable it.

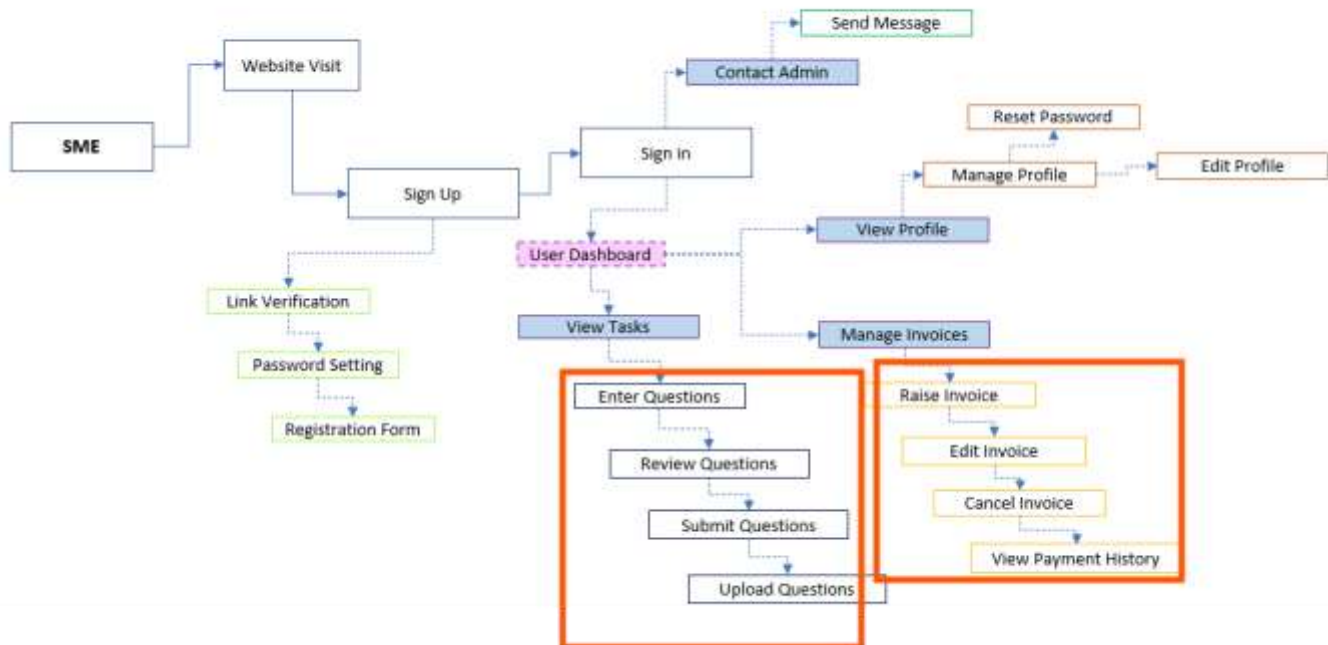

Issue 19. He can view payment history on his invoice management page. (After CJ Admin approves and initiates the payment, the same is confirmed through the invoice management system.) The facility is currently not available. Enable it.

5. SME User

SME Users are empanelled subject matter experts who are assigned to create questions in their domains of expertise. CJ Admin assign them Question creation tasks. They are not regular employees; therefore, they raise invoice against the work they complete.

Ref: User Details (PPT), slide 6, sent on 04-04-2026 on WhatsApp

User 6: SME

Issue 1. SME should not have access to all questions in QB. He can view/edit only those questions he has created. Currently, he can view all questions in the question bank.

8 Quantitative Aptitude	Geometry	MCQ-Text	10	4	1	Medium	Application	Create Question
9 Quantitative Aptitude	Geometry	MCQ-Text	10	4	1	Difficult	Application	Create Question

Issue 5. SME should be able to initiate Qn creation directly from the assigned task by clicking relevant hyperlink that takes him to the Qn creation page that auto-fills Qn specifications from the task. This facility ensures that there are no errors in the selection/entry of Qn creation fields. If SME has to manually select/enter relevant question fields, there are chances of errors and mismatch with the task specification. (CJ Admin should select question properties such as categories/subcategories, difficulty level etc. rather than manually entering them.) See the sample task sheet display above.

Note: When the SME clicks on the Create Question link, it takes him to the relevant Qn creation page with all specified fields auto-filled. This process avoids human error completely and makes sure the Qn creation process is easy, error-free and efficient.

Issue 6: He should be able to send/receive messages (live-chat) to/from the CJ Admin/ Helpdesk. The facility is currently not available. Enable this feature.

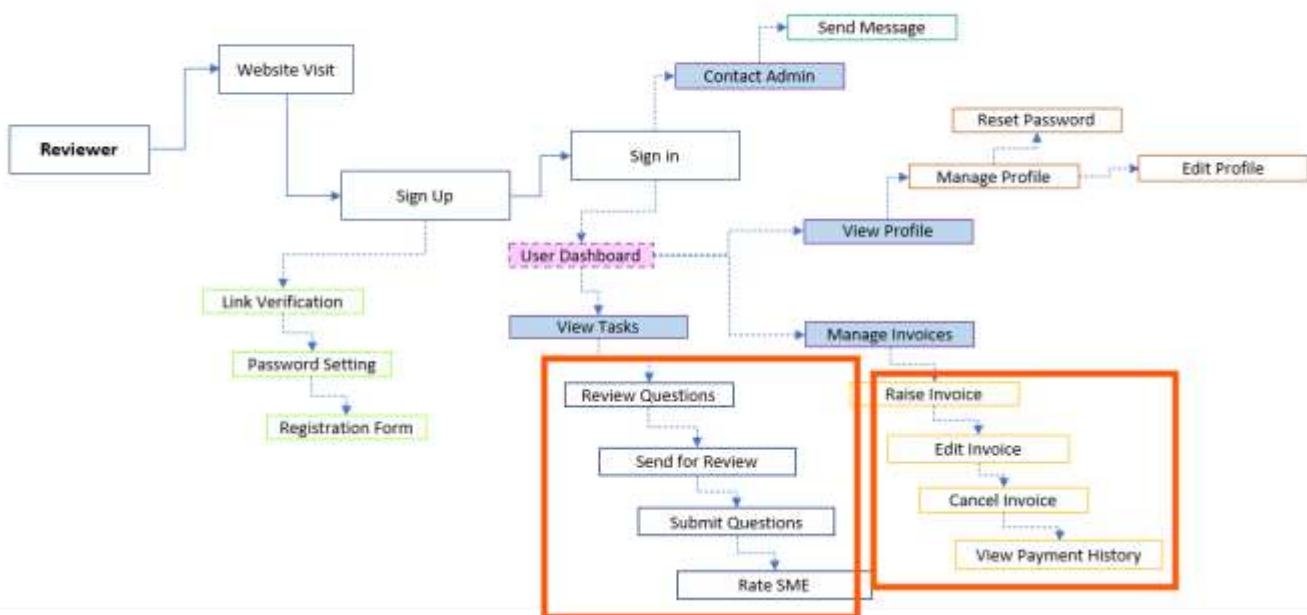

Issue 7. He can create/revise/cancel an invoice and send it to the CJ Admin for payment. The facility is currently not available. Enable it.

6. Reviewer

Reviewers are empanelled subject matter experts who are assigned to review questions in their domains of expertise. CJ Admin assign them Question review tasks. They are not regular employees; therefore, they raise invoice against the work they complete.

Ref: User Details (PPT), slide 7, sent on 04-04-2026 on WhatsApp

User 7: Reviewer

Issue 1. Reviewer should not have access to all questions in QB. He can view/review only those questions he has been assigned. Currently, he can view all questions in the question bank.

Review History

Send Back to Previous Stage Content Review (Reviewer) Rating: 4/5

Review it

by Reviewer on 1/8/2026, 5:08:03 pm

Issue 8. If a question is sent back the psychometrician, and the SME updates the question after review, it comes back to the reviewer for a second round of review. In this case, he has to give a new rating on the updated question, which should replace the old rating. Currently, both old and new ratings are shown. (Old rating can be shown in the review history, but when review ratings are used for question quality analysis, only the latest rating should be available.)

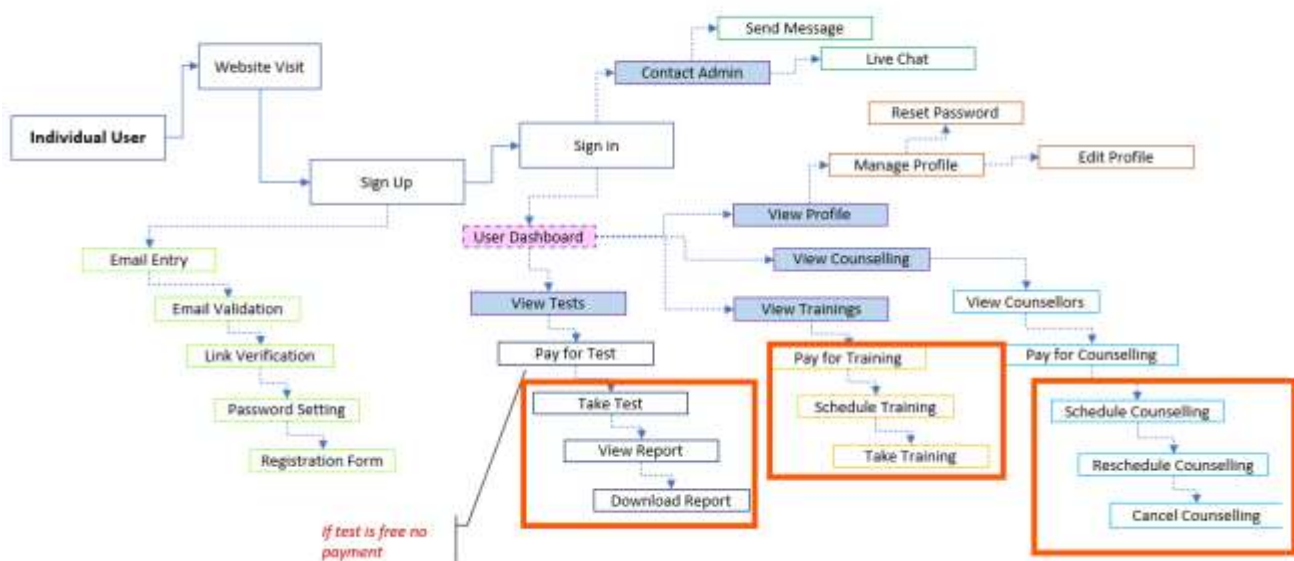

Issue 9: Reviewer should be able to send/receive messages (live-chat) to/from the CJ Admin/ Helpdesk. The facility is currently not available. Enable this feature.

Issue 10. He can create/revise/cancel an invoice and send it to the CJ Admin for payment. The facility is currently not available. Enable it.

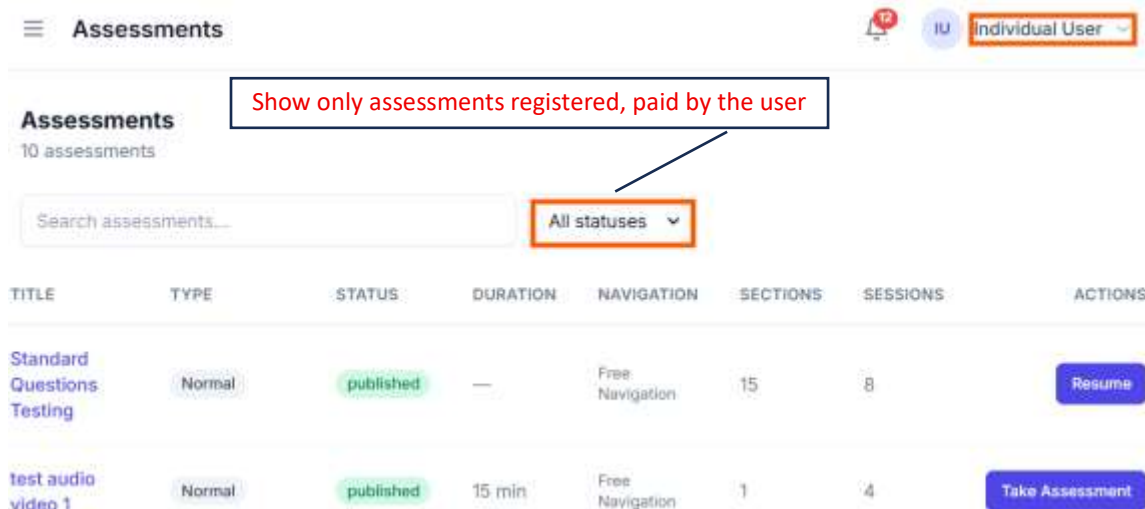

7. Individual User

Individual user is anyone who comes to the CJ Website and search for assessments/training/counselling services. They can avail all services offered by CJ by signing up and filling a registration form. Ref: User Details (PPT), slide 1, sent on 04-04-2026 on WhatsApp

User 1: Individual User

Issue 1. Individual user can view/take/resume ONLY those assessments which he has registered and paid with his account. The complete list of assessments, training courses, and counselling services are shown on the CJ Webpage. Viewing them does not need the individual user to login to his account. Currently, entire list of assessments (all statuses) is available on individual user's assessment page. Reconfigure the feature.

Issue 2. If the Individual user has registered for an assessment but has not paid, then when he logs in, a popup message 'Payment is pending for your _____ Assessment', followed by 'Pay Now' button.

Issue 3. Individual user, after selecting an assessment/training/counselling, should fill the registration form. Available personal information from the profile page shall be auto-filled. He has to complete remaining blank fields. Currently, registration feature is not available. It should be enabled.

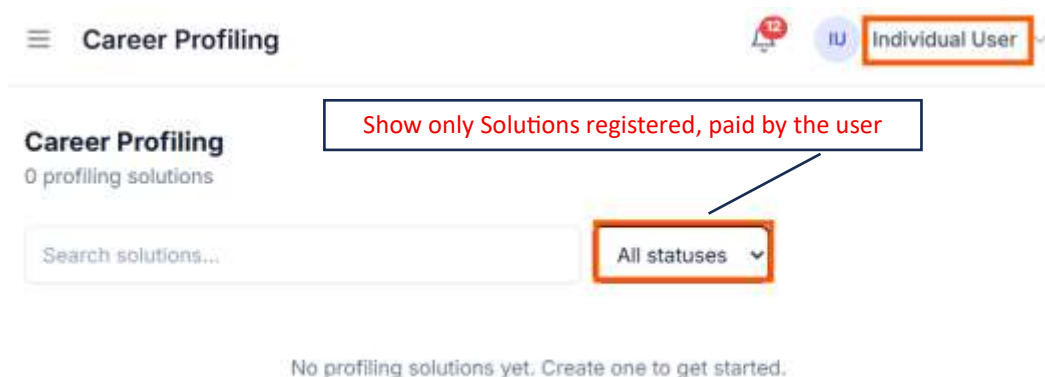

Issue 4. Create separate tabs for viewing assessments: Not Attempted, Suspended, Completed. Those assessments under 'Not attempted' will show 'Start Assessment' button; similarly, 'Resume' button for 'Suspended' category and 'Show Results' for 'Completed' category.

Issue 5. Registration form should have mandatory and optional fields. The profile page does not show some mandatory fields as mandatory. Enable the mandatory feature: First Name, Last Name, Gender.

Issue 6. Change some registration fields from optional to mandatory: Mobile Number, State, City, Institution Name, Place of Institution

Issue 7. Change 'Highest Education' field to 'Professional Education' and from mandatory to optional. Because, all users may not have a professional degree.

Issue 8. Only paid *Profiling Solutions* (published) should be available on the Career Profiling page.

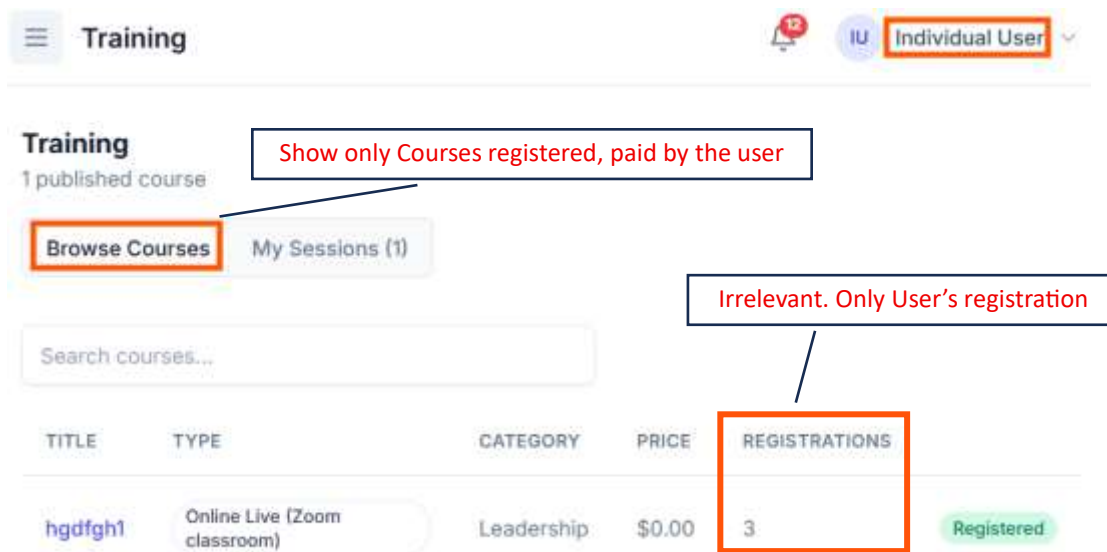

Issue 9. Create separate tabs for viewing Profiling Solutions: Not Attempted, Suspended, Completed.

Issue 10. Individual user should see ONLY his reports. Currently, all reports in the system (all statuses) are shown. Disable the feature.

Issue 11. Download button should be available to download the report as a PDF file.

Issue 12. Individual user should view only those training courses which he has registered and paid for. Currently, all courses (all statuses) are shown. Reconfigure the feature. *Browse Course* button will take him to CJ Webpage with listing of all courses available.

Issue 13. If the Individual user has registered for a course but has not paid, then when he logs in, a popup message 'Payment is pending for your _____ Course', followed by 'Pay Now' button.

Issue 14. Create separate tabs for viewing training courses: New Course, Ongoing, Completed. Those courses under 'New Course' will show 'Begin Course' button; similarly, 'Continue' button for 'Ongoing' category and 'Show Results' for 'Completed' category.

Issue 15. Change the tab presentation order: Overview >> Structure >> Learn >> Live Sessions >> Assignments >> Assessments. (Assignment has been missed out.) Change Created by to **Trainer Name** and

Description to *About the Course*. Remove *Registrations*, it is irrelevant. (He doesn't need to know how many people have registered for the course.)

Book

Show only Sessions registered, paid by the user

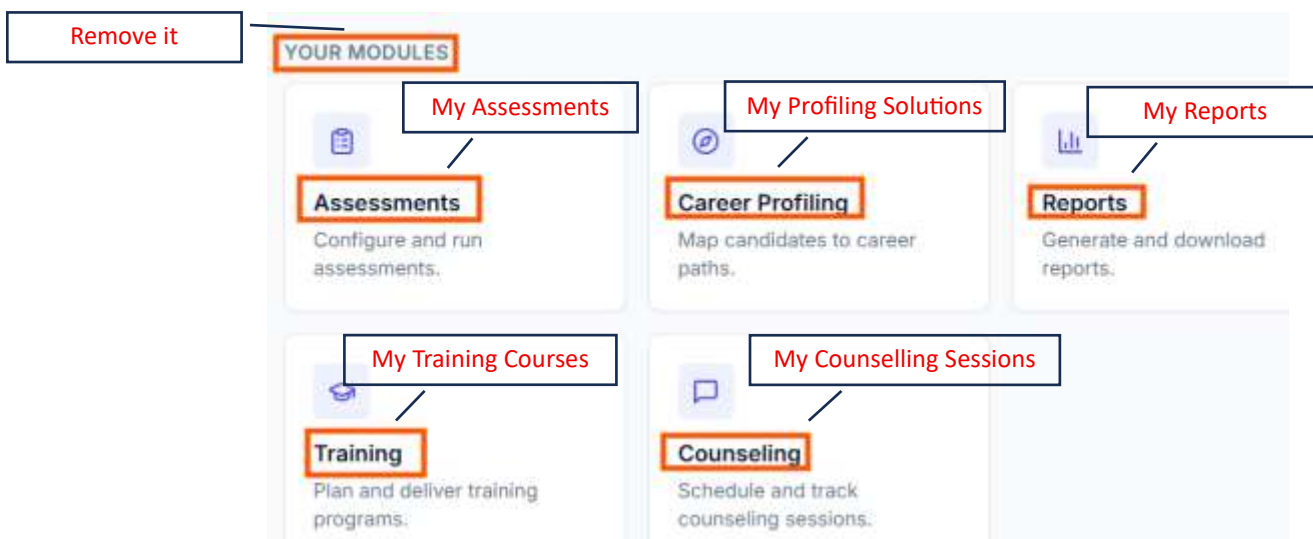

Issue 17. If the Individual user has registered for a counselling session, but has not paid, then when he logs in, a popup message 'Payment is pending for your Counselling Session with _____', followed by 'Pay Now' button.

Issue 18. After booking, notification does not reach the counsellor. (When checked on the counsellor side, it shows no notification.)

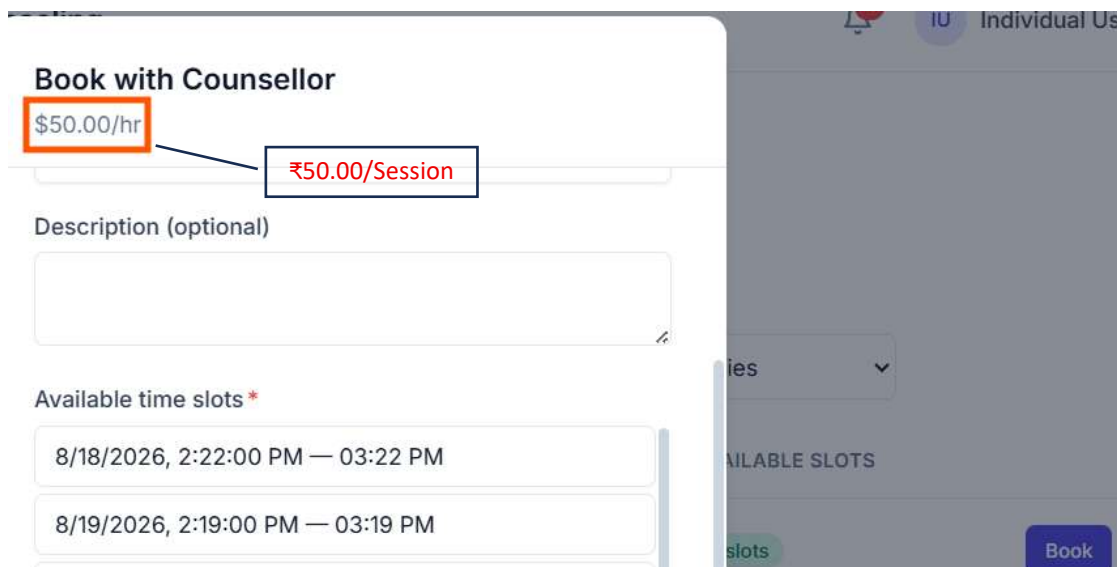

Issue 19. When clicking on 'Counsellor' hyperlink, it shows the following error page.

Issue 20. Change the module-wise presentation of tabs to *My Assessments*, *My Profiling Solutions*, *My Reports*, *My Training Courses*, and *My Counselling Sessions*.

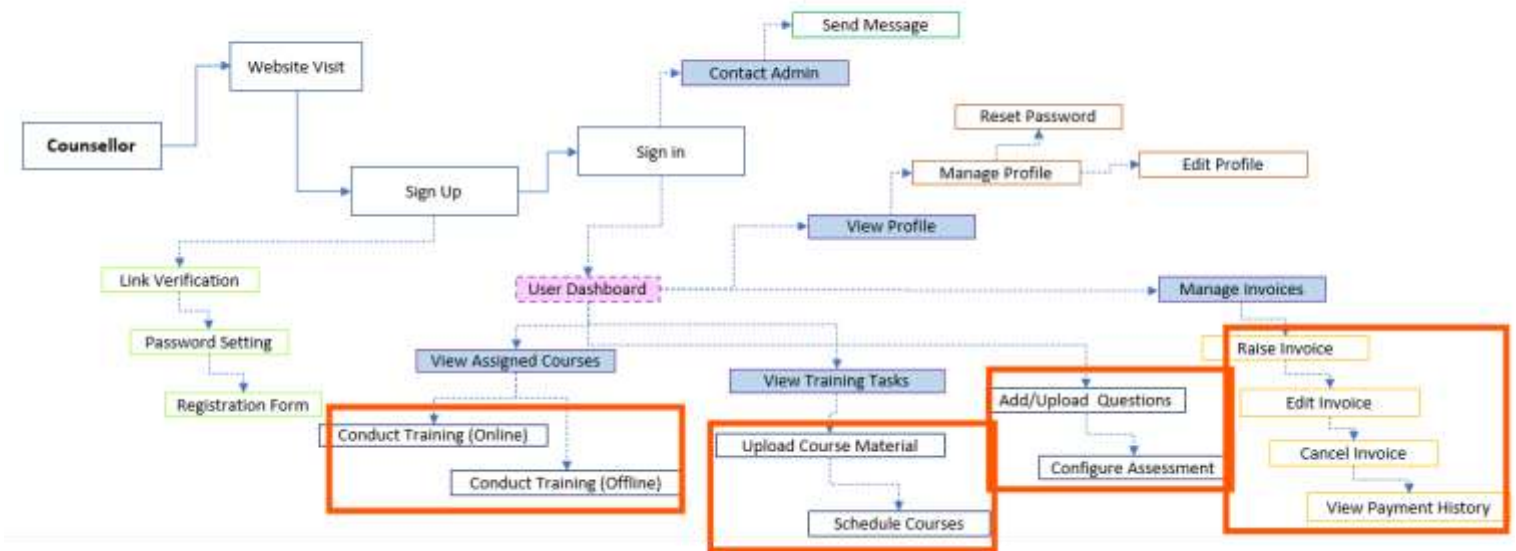

Issue 21. Change '/hr' to '/Session'. Change all currency denomination from dollar to rupees.

8. Trainer

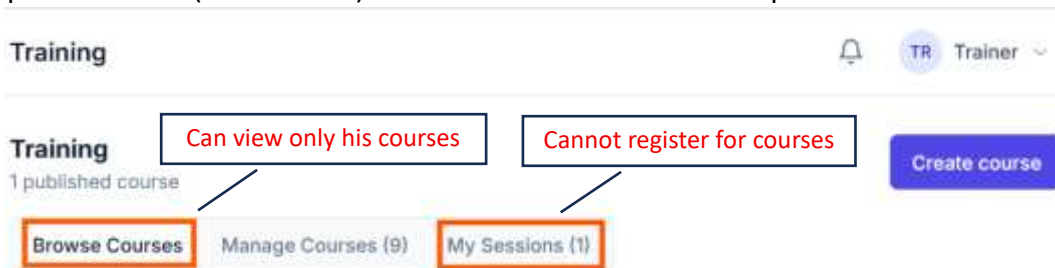

A trainer is an empanelled subject matter expert in a particular domain. There will be a number of trainers thus empanelled with CJ (e.g., foreign language trainers, technical skill trainers, soft-skill trainers, etc.). They create and manage training courses in their respective domains. They also conduct live sessions as per the course structure.

Ref: User Details (PPT), slide 9, sent on 04-04-2026 on WhatsApp

Issue 1 : Trainer should not browse and view all the training courses in the CJ system. He is permitted to view training course he has created and is responsible for. Disable 'view all' feature.

Issue 2 : He cannot register for any course. Therefore, *My Courses* (not ~~*My Sessions*~~) tab is irrelevant, therefore to be removed. However, he should be able to run a course for testing purpose, hence an appropriate feature (like *Preview*) to test course content shall be provided.

Issue 3 : Trainer should have the right to create the structure first time. However, after publishing it, he cannot make any changes. (This activity comes as part of the *training management process*.) Only CJ Admin has the right. This is to prevent any unauthorized changes in the course structure, because Individual users who have registered would be attending the course, and the trainer cannot change the structure in the midst. Currently, the trainer cannot create the structure first time when he creates a course. (The trainer has the responsibility for all the course setting-up process including structure.)

Overview Structure (0 lessons) Live Sessions (0) Assessments (0) Registrations

Course Structure

No lessons yet. Add your first lesson below.

New lesson title * Week

Lesson 1 1 Add lesson

✕ Course structure can only be modified by CJ Admin (SRS §5). Trainers may modify assignments and main session contents only.

User can create course structure first time, but need CJ Admin permission to modify after publishing

Ref: Module-wise support doc >> 7. Training Setup Process >> page 5, section 5

5. Training Management Process

The trainer-user can modify the contents of the course with the permission of the Admin user. Such activities include adding new assignments, replacing main session contents with new ones. However, course structure cannot be modified by the trainer-user, but only by the Admin user. Deleting a course is also the right of the Admin user only.

Issue 4 : Trainer should be able to send a permission request to CJ Admin to modify the structure, including adding/changing contents. After approval, he should be able to modify the structure and content.

Issue 5. There should be the facility to format the text, such ***italics, boldface, text color, font size, underline*** for the *Text Content* field. At least all these facilities are required, because it is necessary to make the text presentation appealing and interesting. For the learner it is very important.

▼ A1 Lesson 1 - Topic 1 - Session 2 (0 content, 0 assignment) + Content + Assignment ✕

Dummy Title Text ▼

In every project or creative endeavor, a "dummy title" often serves as a temporary marker—an anchor that holds space until the true essence of the work is revealed. It is both a promise and a pause, reminding us that beginnings don't need

Add content Cancel

Issue 6. Not able to edit the content after adding. Editing option is needed to change any content. Only way is to delete and re-enter. Enable *Edit* feature.

Course Structure

▼ Chapter 1: GUTTEN TAG! (Week 1) + Topic ✕

▼ Greetings & Farewell + Session ✕

▼ GREETINGS & FAREWELL (3 content, 0 assignment) Interactive + Content + Assignment ✕

GREETINGS & FAREWELL

text Session1 - Content 1 ✕

video Session1 - Video 1 (120s) (1 Q) Timeliner ✕

audio Session1 - Audio 1 (106s) ✕

Issue 7. Timeline setting is not enabled. It is not possible to start the player and set the timeline or directly enter it. Enable the timeline setting.

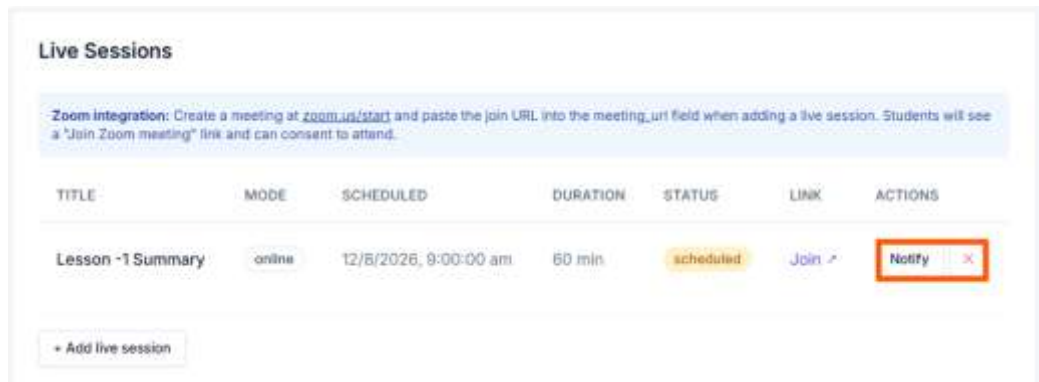

Issue 8. Assessment creation facility by the trainer has not been enabled. **This issue was raised in the System Testing and Review Feedback Report 3 sent on 30-07-2026. (Ref: page 3-4, section 4, Issue 1 under the head 'Training')**. Assessment creation by trainer is an important feature that must be enabled for following reasons : (1) The questions and assessments created by the trainer are specifically for the training purpose. (2) They do not need high quality standards and, therefore, do not need to go through the review process. (3) Those assessments don't require creation of reports (reporting process); only the summary scores are required. (4) They should not go public because their objectives are limited to training purposes and do not meet those of the general public (Individual users). (5) Trainer has to create questions based on the course content, and it will be most efficient if he can create questions (all standard-type questions) and short assessments at the time of creating the course. The limitations of the currently available facility are that the trainer is required to login as an SME and create questions (duplication of user credentials); questions need to go through the review process; psychometrician has to set up the assessment; and the assessment should be published before the trainer can access it.

Issue 9. Assessment should be linked to specific session, topic or lesson. In a course, there are many lessons, topics, and sessions, so linking should specify which of them the assessment should be linked to. **The issue was raised in previous report ((Ref: page 3-4, section 4, Issue 2 under the head 'Training')).**

Currently, the selection list shows 'End of Session, End of Topic, End of Lesson, and End of course, but does not specify which session, topic or lesson (except in case of End of Course, where it is not needed). A possible solution is to provide *Link Assessment* button, just like *Add Assignment* button. Or, the assessment page should show the entire course structure, and the user can select a specific session, topic or lesson from the structure and directly link the assessment.

Issue 10. Currently, there is no way to check whether a message reaches the individual user after the trainer clicks on the 'Notify' button.

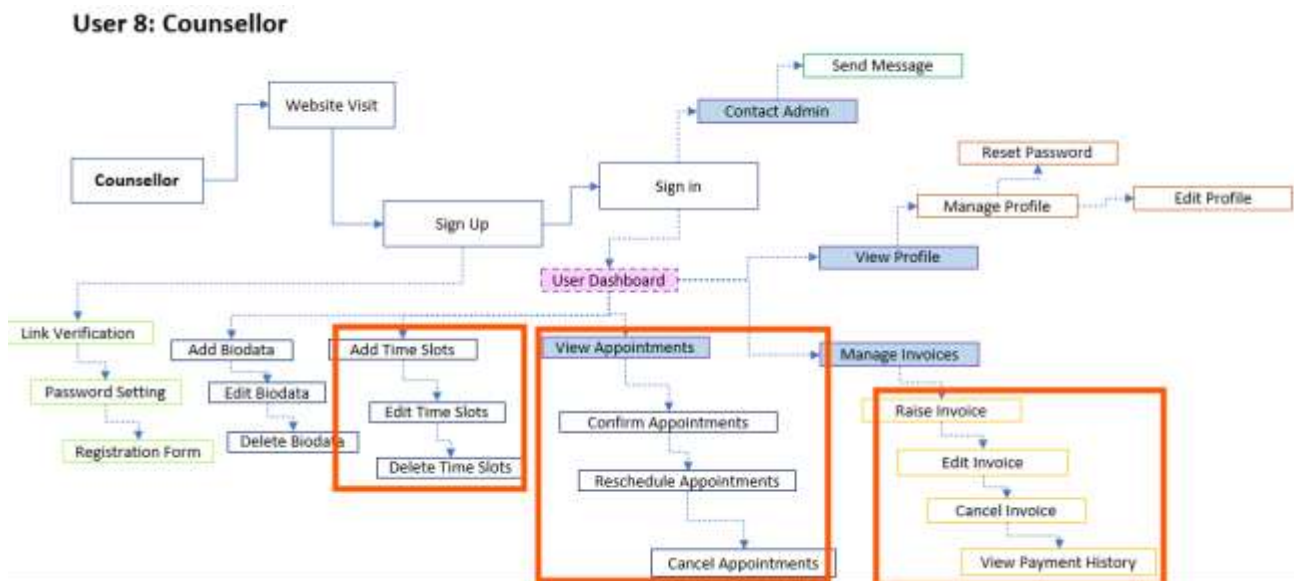

Issue 11: Trainer should be able to send/receive messages (live-chat) to/from the CJ Admin/ Helpdesk. The facility is currently not available. Enable this feature.

Issue 12. He can create/revise/cancel an invoice and send it to the CJ Admin for payment. The facility is currently not available. Enable it.

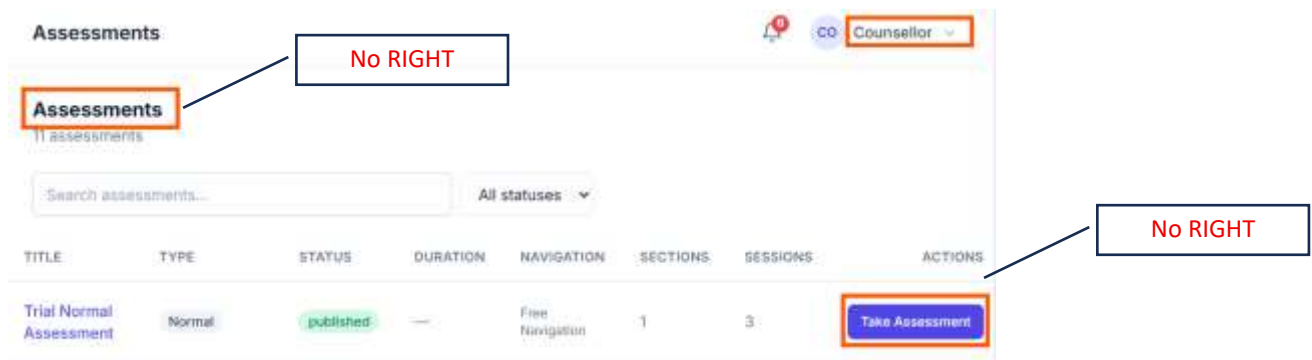

9. Counsellor

A trainer is an empanelled professional in various fields of counselling. CJ system will have a number of such counsellors across India (or even all over the world) with specializations in different fields of counselling. Individual users across the world can use the CJ Counselling system to avail counselling services according to their needs.

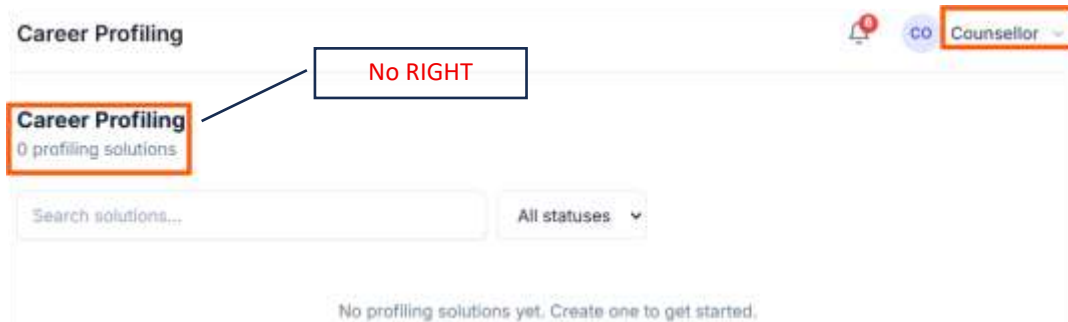

Ref: User Details (PPT), slide 8, sent on 04-04-2026 on WhatsApp

Issue 1: Assessment tab is not required. Counsellor has NO RIGHT to access any assessments or take assessments. Disable/remove the tab.

Issue 2. Counsellor has NOT RIGHT to access any profiling solutions. Disable/remove the tab.

Issue 3. He has NO RIGHT to access all reports in the CJ system. Currently, he can access any user's reports from the CJ report list. His access to reports is limited to his clients only.

Issue 4. He has NO RIGHT to create any report. Disable the feature.

Issue 5. Counsellor can access/view reports of only those individual users who have registered and booked (paid) a session with the counsellor. Normal flow of this process is like this: After the individual user views/downloads the report of an assessment he has completed, the system asks him whether he wants to consider a counselling session on the assessment report with an expert. If he confirms and book a counselling session, the system opens a link on the counsellor's page with path to access the respective report. *Ref: Module-wise support doc >> 8. Counselling Process >> page 1, section 2*

2. End-user (Counselee)

Anyone who takes an assessment may be directed to the counselling programs when they open or download the report. Here, counselling is a continuation of the assessment. After reading the report, if the customer wants to have a counselling session, he is directed to counselling programs. Alternatively, anyone who visits the website may want to register for counselling. There are different categories of counselling available on the counselling platform, such as career counselling, counselling related to learning difficulties, emotional problems, relationship problems, marital problems, clinical problems or health counselling. Anyone who is interested in any kind of counselling is welcome. A group of empanelled counsellors from different domains are available to conduct counselling sessions. Following activities are included in the registration and appointment fixing process by the counselee.

Issue 6. Counsellor does not need to browse counselors or book counselling session on the CJ platform. Disable/remove those facilities.

Issue 7. *Counsellor should be tagged to any of the counselling categories.* The feature is not enabled.

Issue 8. The counselor should update timeslot schedule *at least for one week, maximum for 3 weeks*. Mandatory 1-week timeslot creation should be enabled. Max 3-week condition should also be enabled.

Issue 9. The timeslots should be arranged in a more usable/understandable manner like in a table.

Add Available Time Slot

Start time *

dd-mm-yyyy --:-- --  [Add 1-hour slot](#)

Each slot is 1 hour. Add at least 1 week of availability (SRS §3.1).

Available Slots (5)

8/18/2026, 2:22:00 PM 8/19/2026, 2:19:00 PM 8/22/2026, 2:21:00 PM 8/25/2026, 2:23:00 PM 8/28/2026, 2:21:00 PM

A sample timeslot display style is shown below.

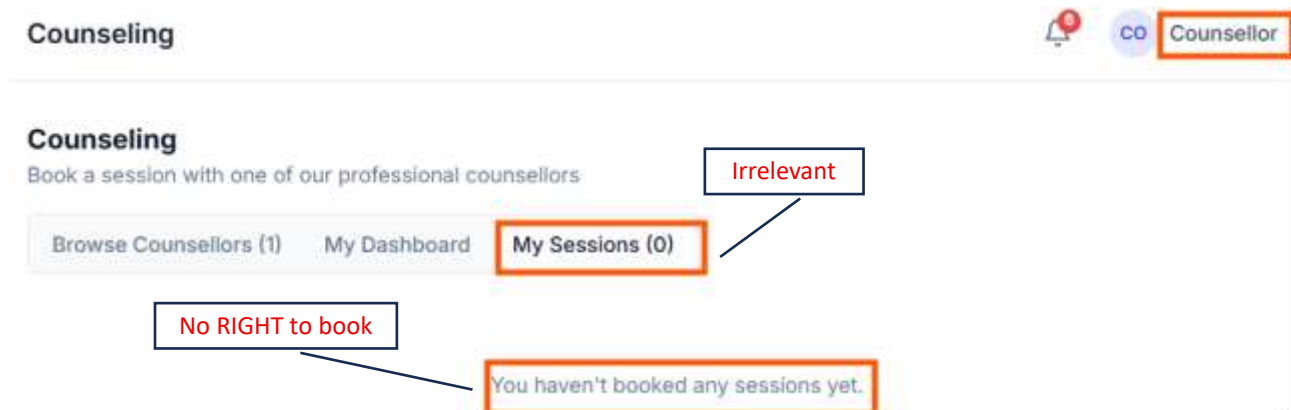

Add Timeslot for Next Week								
Week 1								
Date	Timeslot 1	Timeslot 2	Timeslot 3	Timeslot 4	Timeslot 5	Timeslot 6	Timeslot 7	Timeslot 8
17-08-2026	09:00-09:55 AM	10:00-10:55 AM	11:00-11:55 AM					
18-08-2026								
19-08-2026		10:00-10:55 AM		12:00-12:55 AM	02:00-02:55 PM		04:00-04:55 PM	05:00-05:55 PM
20-08-2026								
21-08-2026	09:00-09:55 AM		11:00-11:55 AM	12:00-12:55 AM				
22-08-2026			11:00-11:55 AM	12:00-12:55 AM		03:00-03:55 PM	04:00-04:55 PM	

Issue 10. Booked timeslots should also be presented in a weekly format.

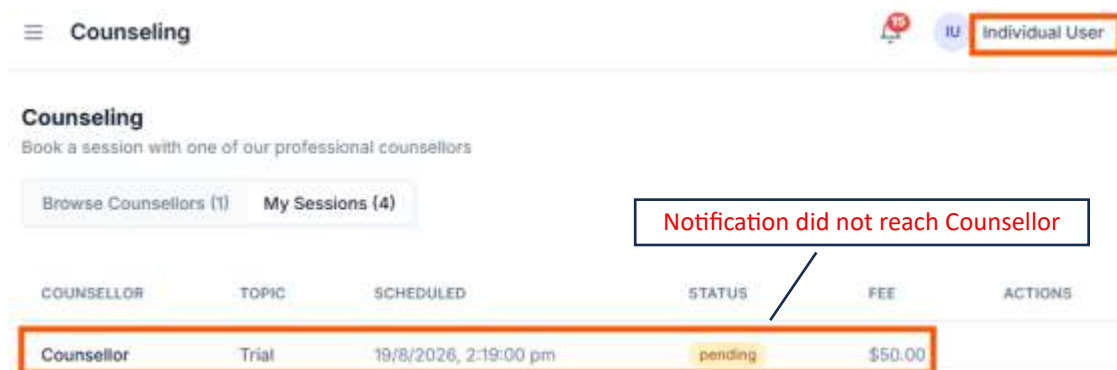

The screenshot shows two sections: 'Available Slots (5)' and 'Booked Slots (1)'. The 'Available Slots' section lists five dates and times: 18/8/2026, 2:22:00 pm; 19/8/2026, 2:19:00 pm; 22/8/2026, 2:21:00 pm; 25/8/2026, 2:23:00 pm; and 26/8/2026, 2:21:00 pm. The 'Booked Slots' section lists one date and time: 19/8/2026, 2:22:00 pm. A red box highlights the 'Booked Slots' section, and a callout points to it with the text 'To be presented in a weekly format'.

Issue 11. Counsellor does NOT HAVE RIGHT to book sessions. Therefore, the tab **My Sessions** is irrelevant. Disable/remove the feature.

The screenshot shows the 'Counseling' interface for a 'Counsellor' user. The 'My Sessions (0)' tab is highlighted with a red box, and a callout points to it with the text 'Irrelevant'. Below the tabs, a message 'You haven't booked any sessions yet.' is displayed, also highlighted with a red box. A callout points to this message with the text 'No RIGHT to book'.

Issue 12. Post-booking notification to the counsellor is not enabled. Enable the feature along with the booking confirmation feature.

The screenshot shows the 'Counseling' interface for an 'Individual User'. The 'My Sessions (4)' tab is highlighted with a red box. Below the tabs, a table displays session details. The first row is highlighted with a red box, and a callout points to it with the text 'Notification did not reach Counsellor'.

COUNSELLOR	TOPIC	SCHEDULED	STATUS	FEE	ACTIONS
Counsellor	Trial	19/8/2026, 2:19:00 pm	pending	\$50.00	

Issue 13. Setting up ZOOM meeting is not available. Enable the feature.

Issue 14. Post setting up ZOOM meeting, a notification should reach the counselee. The feature is either not available or cannot be checked. The same should be enabled.

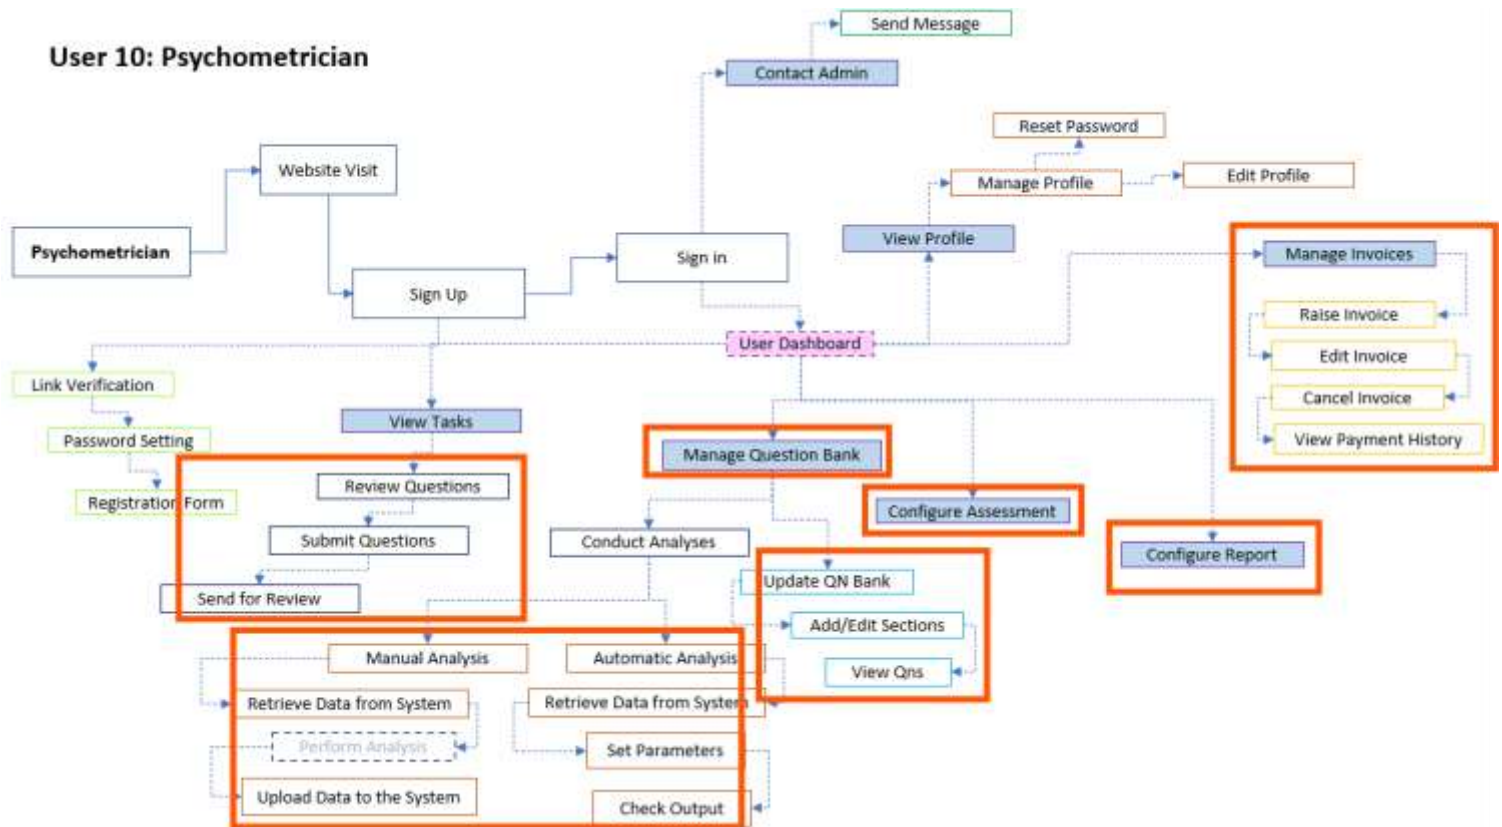

Issue 15: Counsellor should be able to send/receive messages (live-chat) to/from the CJ Admin/ Helpdesk. The facility is currently not available. Enable this feature.

Issue 16. He can create/revise/cancel an invoice and send it to the CJ Admin for payment. The facility is currently not available. Enable it.

10. Psychometrician

A psychometrician is an empanelled professional in psychometrics and assessments. CJ system will have a few such psychometricians to create assessments and reports and manage the CJ QnBank and Assessment systems. He is responsible for *psychometric reviews, psychometric analyses, assessment creation and configuration, profiling configuration, report configuration, and overall QB and Assessment management*.

Ref: User Details (PPT), slide 10, sent on 04-04-2026 on WhatsApp

Issue 1. Features related to psychometric analysis are not available.

Issue 2. Features related to Qn bank management are not available.

Issue 3. Features related to assessment management are not available.

Issue 4. Profiling configuration and management features are not available

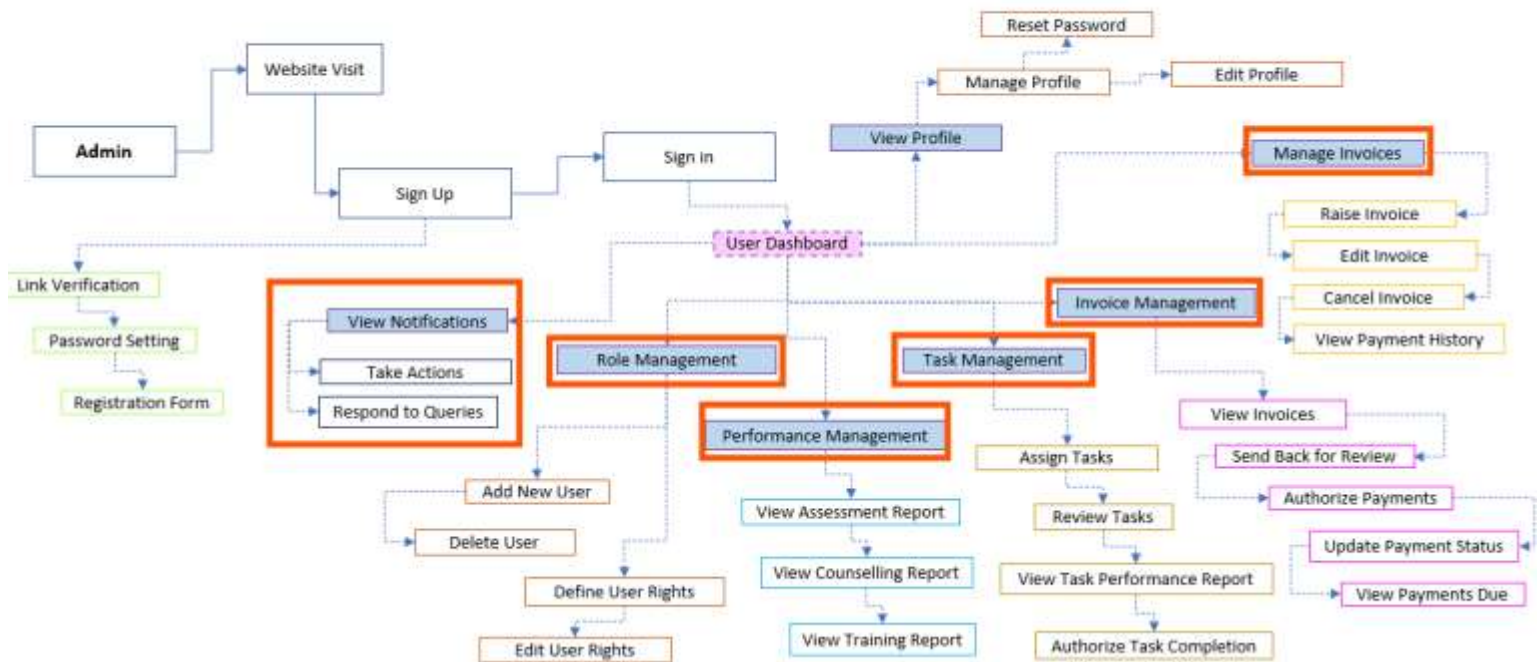

Issue 5. Report configuration and management features are not available.

11. CJ Admin

CJ Admin is the manager who is responsible for the CJ system in its entirety. His rights enable him to oversee and control the activities of various users and ensure the smooth functioning of the system.

Ref: User Details (PPT), slide 11, sent on 04-04-2026 on WhatsApp

User 11: Admin

Issue 1. CJ Admin should be able to tag/link a Corp Admin to a particular Corp organization. Every time a Corp organization is added to the system, its representative in Corp Admin role is also added and linked to the organization. Enable this feature.

Link to a particular organization

Issue 2. CJ Admin should be able to tag/link a Group Admin to a particular group of a particular Corp organization and its Corp Admin. Enable this feature.

The screenshot shows the 'Create user' form. The title 'Create user' is highlighted with an orange box. Below it is the subtitle 'Create a new account and assign a role.' The form contains several input fields: 'Full name *', 'Email *', 'Phone', and 'Password'. The 'Role *' dropdown menu is highlighted with an orange box and shows 'Group Admin' selected. Below the role dropdown are three checkboxes: 'Active' (checked), 'Email verified', and 'Trial account'. At the bottom right are 'Cancel' and 'Create user' buttons. A red text box with the text 'Link to a particular group of a particular organization' has a line pointing to the 'Role *' dropdown.

Issue 3. CJ Admin should be able to tag/link a Corp Excl Admin to a particular Corp Excl organization. Every time a Corp organization is added to the system, its representative in Corp Excl Admin role is also added and linked to the organization. Enable this feature.

The screenshot shows the 'Create user' form. The title 'Create user' is highlighted with an orange box. Below it is the subtitle 'Create a new account and assign a role.' The form contains several input fields: 'Full name *', 'Email *', 'Phone', and 'Password'. The 'Role *' dropdown menu is highlighted with an orange box and shows 'Corporate Exclusive' selected. Below the role dropdown are three checkboxes: 'Active' (checked), 'Email verified', and 'Trial account'. At the bottom right are 'Cancel' and 'Create user' buttons. A red text box with the text 'Link to a particular organization' has a line pointing to the 'Role *' dropdown.

Issue 4. CJ Admin should be able to tag/link a Channel Partner to a particular Channel Partner organization. Enable this feature.

Issue 12. CJ Admin should be able to select specific assessments from CJ's published list of assessments and assign them to a Corp Organization according to their requirements. Currently not available, enable the feature.

Issue 13. He should be able to select specific training courses from CJ's published list of courses and assign them to a Corp Organization according to their requirements. Currently not available, enable the feature.

Issue 14. He should be able to assign CJ's counselling services to a Corp Organization. Currently not available, enable the feature.

Issue 15. CJ Admin should be able to assign selected QB, Assessment and Training configuration rights to a Corp Excl Organization based on each organization's specific requirements. (This is an exclusive environment, where *no one from CJ team should have access to the Corp Excl organization's questions, reports, assessments, reports or training courses, and no one from the Corp Excl organization should have access to any of CJ Qn Bank, assessments, reports, training courses, or profiling solutions.*) Following are the rights that can be selected:

1. Category creation
2. One or more of question types (selected question types depending on requirements). All functionalities associated with a particular question type will also be included.
3. One or both assessment types (Normal/ Psychometric) depending on requirements. All functionalities associated with the selected assessment types are permitted.
4. One or more reporting types depending on requirements. All functionalities associated with the selected report types are permitted.
5. One or more training course types along with associated functionalities for each selected course type.

Note: Profiling solution module and counselling module are not included in permission list.

Issue 16. CJ Admin should be able to set up exclusive Webpages for different Cor Excl organizations. He may either select from available Webpage layouts (templates) or create customized Webpage for each organization separately. Enable the feature.

Issue 17. CJ Admin should be able to assign specific published assessments to channel partners based on each one's requirements. Enable the feature.

Issue 18. He should be able to assign specific published training courses to channel partners based on each one's requirements. Enable the feature.

Issue 19. CJ Admin should be able to view invoices from psychometrician, channel partner, reviewer, SME, trainer, counsellor, and Helpdesk, send them back for review or approve for payment. Enable the feature.

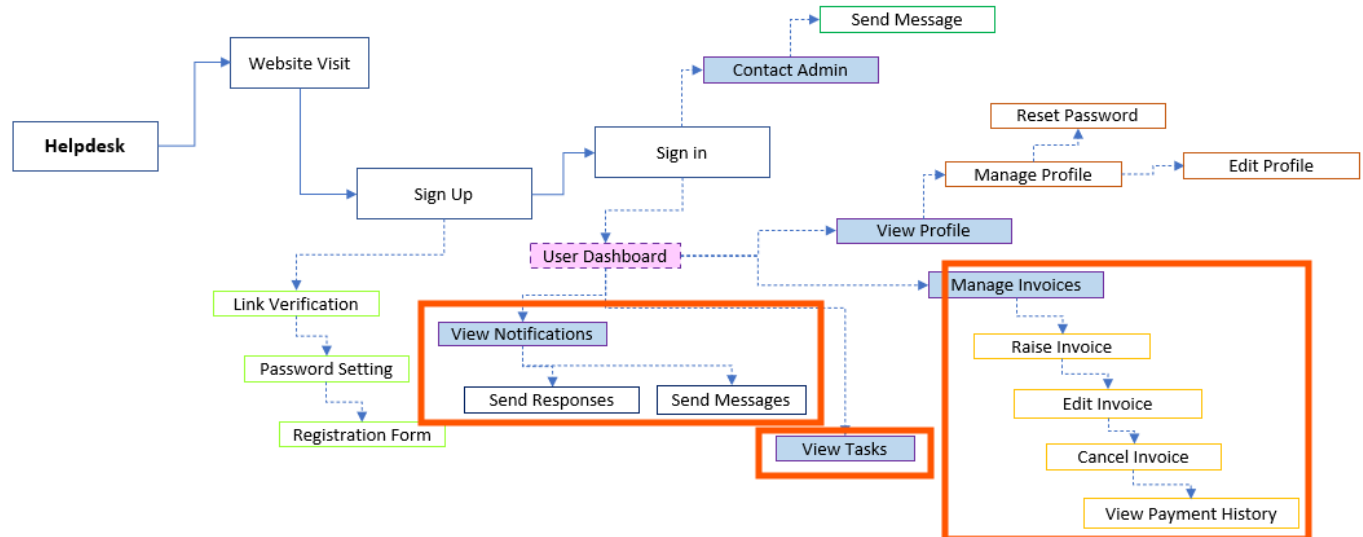

Issue 20. Post payment of invoice, he is able to confirm the payment by clicking the 'Your Invoice Paid' button. Enable the feature.

Issue 21. CJ Admin should be able to send/receive messages from any users from the CJ system. Currently, not available, enable the feature.

12. Helpdesk

Helpdesk is the CJ representative who liaisons between different users of different roles. Activities happening on the system are notified to the Helpdesk, who in turn interact with concerned users, listen to their queries, requests, and issues and mediate to find answers and solutions.

User 12: Helpdesk

Not available for checking features.
